Stainless Collection

featuring Stainless Steel kitchen appliances

Make your kitchen the focal point of your home with Whirlpool brand's leading design. Flawless exteriors and alluring finishes will enhance your appliances and create a premium kitchen experience that is sure to inspire.

Ice Collection

featuring White Ice kitchen appliances

Accented with soft cues of metal, this exclusive collection redefines the classic white design. An exciting modern signature is balanced against a beautiful finish to bring appliances to a new level of sophistication.

Ice Collection

featuring Black Ice kitchen appliances

Elevate the design and sophistication of your appliances with the dramatic beauty and refined style of this exclusive collection. By balancing modern cues in metal against a sleek black surface, these enticing models will energize any kitchen.

REFRIGERATION

WRS965CIAH

SIDE-BY-SIDE REFRIGERATORS

Stores more fresh and frozen food

The largest side-by-side refrigerator in the industry* offers a variety of flexible storage solutions to deliver unprecedented fresh food space. The In-Door-Ice® Plus system also helps these models deliver the largest capacity freezer in the industry.**

Offers greater shelf space

Industry-exclusive MicroEdge™ spill-control shelves offer 25% more usable shelf space† and hold up to 75 lbs of food. Not only do they offer wall-to-wall storage, they also manage leaks and help prevent them from spreading.

Cools food quickly

Save energy and cool your food quickly with the Accu-Chill™ temperature management system. This intuitive system senses and adapts using built-in sensors to save more energy and deliver efficient cooling performance, while Adaptive Defrost saves more energy†† by defrosting only when necessary.

Opens up freezer space

By placing the icemaker and removable ice bin in the door, the In-Door-Ice® Plus system creates 30% more usable space in the freezer.‡ The ice bin also tilts out or can be removed with one hand, to make filling glasses or pitchers with fresh, filtered ice easy.

NOTE: Not all features are available on all models.

*Among freestanding side-by-side refrigerators. **Among freestanding refrigerators. †Compared to Whirlpool® side-by-side models without MicroEdge™ shelves. ††As compared to Whirlpool® side-by-side refrigerators without Adaptive Defrost. ‡Compared to 26 cu. ft. Whirlpool® side-by-side models with conventional icemakers.

FRENCH DOOR REFRIGERATORS

Offers greater storage

Store more food with the most fresh food capacity available* and the most door bin space in the industry.** Now you can meet all of your food storage needs and have enough space to hold bulk food purchases and large party platters with our 29 cu. ft. model.

Innovative cooling

The AccuFresh™ dual cooling system helps keep fruits and vegetables fresher and helps keep crystals off ice cream. Food stays tasting great with higher humidity levels and improved food preservation.
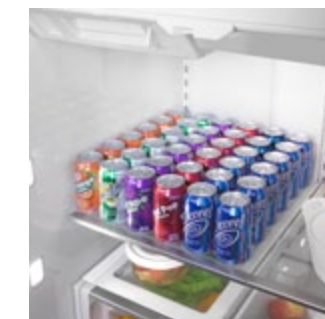

25% more usable shelf space†

Store more items on each shelf with the MicroEdge™ shelves. They not only offer enough strength to hold up to 50 lbs of food, they also help contain leaks. Now your refrigerator will be ready for whatever you bring home from the grocery store.

Opens up refrigerator space

The In-Door-Ice® system creates room for an extra shelf in the refrigerator compartment by storing the ice bin in the door. A removable, clear ice bin lets you fill coolers with ease.

TOP-FREEZER REFRIGERATORS

Stores more fresh and frozen food
Select models feature storage innovations like the largest capacity pantry drawer available,* the fold-away shelf and Tilt-N-Go door bins. Right Fit™ door bins also perfectly hold gallon-size containers. Now you can easily store groceries where you need them.

Superior cooling performance
The temperature management system senses and adapts to deliver great food preservation. Adaptive Defrost saves up to 12% more energy** by running the defrost cycle only when necessary and by monitoring how often the compressor operates and the doors are open.

Keeps food fresh
The FreshFlow™ air filter reduces common food odors by actively circulating air through our carbon-based filter. The FreshFlow™ produce preserver also extends the freshness of produce up to four days longer† by absorbing ethylene gas that causes produce to over-ripen more quickly.

Puts filtered water in reach
Whirlpool brand offers the industry's only top-freezer refrigerator with an exterior dispenser and electronic controls. Select models offer cold, filtered water without opening the door and easy access to features.

NOTE: Not all features are available on all models.

*Among leading brand top-freezer refrigerators with pantry drawers based on drawer volume. **As compared to previous Whirlpool® top-freezer models with Adaptive Defrost; based on 24-hour interval with refrigerator doors left unopened. †Based on commonly purchased produce.

FREEZERS

Saves energy
The #1 rated brand for upright freezers* also delivers nearly an entire lineup of ENERGY STAR® qualified models to choose from. Now it's even easier to store extra frozen food while using less energy, which saves money and helps the environment.

Flexible installation
Reversible doors can be installed to open from the right or the left, depending on kitchen style and configuration, for added flexibility.

Offers peace of mind
Don't waste time worrying about whether or not you've left the freezer door open or if the freezer is too warm. An alarm notifies you if the freezer reaches temperatures above freezing.
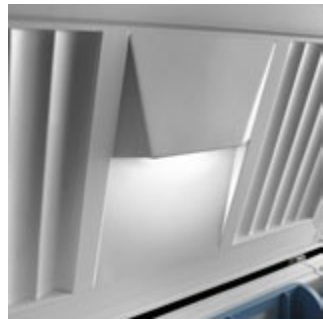

Easy-to-find food
Select Whirlpool brand upright freezers and chest freezers offer 40 watts of illumination, providing the most watts available** so you can easily see what you're looking for, even in the back of the freezer.

PUR® Water Filter
FILTER 1/W10295370
Models: WSF26C2EX, WRS526SIA, GSF26C4EX, GSS26C4XX, WRS537SIA, GSS30C6EY, GSC25C4EY, GSC25C6EY, WRS965CIA and WRF560SMY, WRF560SEY

FILTER 2/W10413645A
Model: WRF989SDA

This filter reduces water contaminants in select Whirlpool® bottom-freezer refrigerators on the right hand side.

PUR® Push-Button Water Filter
FILTER 3/4396841

Reduces lead, chlorine taste and odor in your drinking water.* This NSF Certified filter features a base grille location and push-button system for easy replacement.

PUR® Inside-Turn Water Filter
FILTER 4/UKF8001

The improved filter design reduces 33% more contaminants,** and its location in the top of the cabinet makes the filter easier to replace, too.

FreshFlow™ Produce Preserver
Fresh 1/W10346771A

This replaceable cartridge provides 6 months of ethylene absorption in the crisper drawer, extending the freshness of produce up to four days longer.†

FreshFlow™ Air Filter
Air 1/W10311524

This smart air filter is up to 15 times more effective than baking soda in reducing common food odors. Replace filter every 6 months for optimal performance.

Satina™ Stainless Look Finish and Stainless Steel Side Panels
· 1 side panel (fits either side on side-by-side and french door refrigerators)
· No tools required—kit includes everything you need for installation
· Satina™ stainless look finish resists fingerprints, accepts magnets and is easy to clean

REFRIGERATOR MODEL	STAINLESS STEEL	SATINA™ STAINLESS LOOK FINISH	DIMENSIONS

*The contaminants or other substances reduced by this water filter are not necessarily in all users' water. Use only on municipally treated water or other supply known to be microbiologically safe. **Compared to Whirlpool® FILTER 3 (4396841). †Based on commonly purchased produce.

Accu-Chill™ temperature management system
Adds built-in sensors to measure the internal temperature and activate the compressor only when necessary to conserve energy while helping to keep food fresh.

AccuFresh™ dual cooling system
This innovative dual evaporator system is found on select french door refrigerators. It helps keep fruits and vegetables fresher and helps keep crystals off ice cream. It uses the right humidity levels in the refrigerator and freezer compartments for improved food preservation.

ADA compliant
Top-freezer refrigerators with this designation fully comply with federal guidelines for accommodating persons with disabilities.

Adaptive Defrost
Monitors when the compressor is running and defrosts only when necessary, resulting in improved food preservation and energy savings.

Adjustable door storage
Gives you the flexibility to store beverages anywhere in the refrigerator door by moving bins where and when you need them.

Automatic defrost system
Refrigerators with this system include a timer, a limit switch and a heater that melts away frost so you don't have to take everything out of your freezer to melt built-up ice.

Can caddy
Holds and dispenses beverage cans to make accessing your favorite beverages quick and easy.

CEE Tier Standards
Based on the Consortium for Energy Efficiency (CEE) qualifying product lists—with the Tier 3 standard being the most efficient.

Clear convertible compartment
Helps preserve the freshness of meat and vegetables by allowing cool air from the freezer to enter the convertible compartment at the level you select.

Condiment Caddy
Transfers condiments or other items easily from the refrigerator to the table or grill.

Counter depth configuration
Fits virtually flush with the countertop, providing up to 6 inches of additional kitchen space while retaining the features and capacity you expect from a Whirlpool® refrigerator.

Clear humidity controlled crisper
Helps preserve the freshness of your favorite fruits and vegetables with controlled humidity levels in the clear, extra-deep crisper. Select side-by-side refrigerators feature the largest crispers in the industry among leading brands.

Electronic ice and water dispenser
Dispenses filtered water on the outside of the refrigerator. A control lock feature prevents unintended operation. Select dispensers include an automatic LED night-light that adjusts brightness as the kitchen goes dark.

ENERGY STAR® qualification
Exceeds government standards by over 20% to help conserve natural resources and save money on utility bills.

Fast Cool option
Quickly lowers the refrigerator's temperature at the push of a button. Select Fast Cool after filling your refrigerator with groceries to quickly cool fresh food.

Fast Freeze
Drops the freezer's temperature as low as it can go in the shortest amount of time. Activate Fast Freeze just before adding large amounts of unfrozen food.

Fast Ice
Drops the freezer temperature in select models for a full 24 hours to increase ice production by over 30%.*

Freezer divider
Easily customizes freezer storage and organizes frozen food using the moveable freezer divider bin.

FreshFlow™ air filter
This smart air filter is up to 15 times more effective than baking soda in reducing common food odors. Replace the filter every 6 months for optimal performance.

FreshFlow™ produce preserver
Extends the freshness of produce by up to four days.** A cartridge absorbs ethylene gas that causes fruits and vegetables, like lettuce and cantaloupe, to over-ripen more quickly. Replace the filter every 6 months for optimal performance.

In-Door-Ice® system
In french door refrigerators, this innovative system moves the ice bin to the door to create room for an extra shelf in the refrigerator compartment. In side-by-side models, moving the ice bin to the door helps the freezer store up to 8 more frozen pizzas.† A removable, clear ice bin lets you fill coolers with ease.

In-Door-Ice® Plus system
By placing the icemaker and removable ice bin in the door, this system creates 30% more usable space in the freezer.†† The ice bin is also easily removed for portable ice any time.

Measured Fill
Allows you to select the exact amount of filtered water—in ounces, cups or liters—that you need. The dispenser will fill the container and automatically shut off when complete.

MicroEtch™/MicroEdge™ spill-control shelf
This industry-exclusive innovation gives you 25% more usable shelf space.‡ Each shelf helps create wall-to-wall storage and makes cleaning inside the refrigerator easier than before.

No-slip door bin mat
Keeps items stored in the door bins in an upright position. The mats are removable for easy cleaning.

Pizza pocket
Easily stores frozen pizzas upright in the french door refrigerator's freezer, without the hassle of trying to fit them on flat freezer shelves.

PUR® water filtration system
Reduces contaminants from household water, giving you chilled, filtered water from your refrigerator for up to 6 months. Our new PUR® water filtration system found on select models can save you up to $600 a year instead of buying bottled water.‡‡ The improved filter design is more compact, easier to replace and reduces 33% more contaminants.¥

Satina™ finish
Resists fingerprints for a smooth, glossy appearance, giving your kitchen a touch of style with everyday practicality. Accepts magnets and requires no special cleaners.

Satina™ Steel finish
Available on select models, the Satina™ Steel finish provides a look that is even closer to true stainless steel. It cleans easily without special products, resists fingerprints and is magnetic.

SideKicks® upright models
Place the refrigerator and freezer models side by side and get up to a combined 36 cu. ft. of storage for all your favorite foods. Both models feature gallon door bins and are ENERGY STAR® qualified.

SpillGuard™ glass shelf
Helps contain spills and simplifies cleanup, preventing liquids from leaking onto shelves below. Some models feature shelves that are adjustable and slide out, providing easy access to items stored in the back of the refrigerator.

SpillMizer™ glass shelf
Helps contain messy leaks and spills for easier cleanup. Shelves are both adjustable and transparent.

Split door styling
This two-door style combines the easy access of an upright freezer with the bulk food capacity of a chest freezer.

Tap Touch controls
This innovative interface featured on select models brings high-tech style to your kitchen. It allows direct access to refrigerator functions, and its sleek appearance enhances the appeal of any space.

Triple Crisper system
Increases storage flexibility with two larger crispers with humidity controls and a center, smaller crisper.

Tilt-N-Go specialty bin
Great for condiments or a carton of eggs, this specialty bin holds items securely and can be removed from the refrigerator door and placed on the table or counter.

White LED interior lighting
This lighting system found in select Whirlpool Gold® models casts a more natural light on the contents of your refrigerator so food looks as it should instead of reflecting the blue hues found in other lighting systems.

---

*Compared to normal ice production, select models only. **Based on commonly purchased produce. †Space advantage in Whirlpool® 25 cu. ft. models compared to same-size Whirlpool® models with conventional icemakers. ††Compared to 26 cu. ft. Whirlpool® side-by-side models with conventional icemakers.

‡Compared to Whirlpool® side-by-side or french door models without MicroEtch™ or MicroEdge™ shelves. ‡‡Based on use of filtered water and average use of two 6-month, 200-gallon water filters versus purchasing the same amount of leading brand bottled water. ¥Compared to Whirlpool® FILTER 3 (4396841).

COOKING

FREESTANDING RANGES

Bakes evenly and seals in flavors

The AccuBake® system's built-in sensor monitors oven temperature and the cooking elements to deliver consistent, delicious results every time. Models with TimeSavor™ Plus true convection can even roast up to 30% faster.*

Innovative oven cleaning

AquaLift® self-clean technology offers easy and odor-free oven cleaning in only 50 minutes.** Our most energy-efficient self-cleaning cycle available† uses only water and low heat to release baked-on foods from an innovative coating.

More room with a view

Cook multiple dishes with the industry's largest capacity freestanding range available.†† Check on cooking progress without opening the door with the new EasyView™ extra-large oven window, the industry's largest window available.‡

Boils water in half the time‡‡

Select ranges feature an induction cooktop for faster, more efficient cooking. This advanced technology offers easier cleaning and efficient cooking by transferring energy directly into any magnetic cookware.

NOTE: Not all features are available on all models.

*Versus a conventional oven with a 12–14 lb turkey.   **Based on average cleaning time of self-clean cycle with water and moderate soils.
†Versus traditional self clean cycle.   ††Among leading brand single cavity 30" freestanding gas or electric ranges.   ‡Based on interior viewable window of leading brand freestanding ranges.   ‡‡Based on boiling 3.6 liters of water with 9" 3,200-watt induction element versus 12,500-BTU gas burner.

WALL OVENS

Seals in flavors and bakes evenly
TimeSavor™ Ultra true convection uses a rear fan and a third element on select models to cut roasting time and seal in juices. The AccuBake® system also surrounds food with even temperatures to achieve consistent results every time.

Cleans easily
The SteamClean option makes cleanup easy. It spot cleans everyday light spills using only heat and 1-1/4 cups of water—no harsh chemicals or cleaners needed.

Sophisticated design
The sleek styling of new handles and color options adds a modern look that completes any kitchen. Plus, replacing your wall oven just got easier. With the FIT system, your wall oven can fit seamlessly into your current cabinet cutout.*

Largest capacity wall oven available**
Cook multiple dishes for a large family meal or prepare treats for a bake sale with double oven capacities of up to 10.0 total cu. ft. Now there's plenty of room to handle even your largest cooking tasks.

NOTE: Not all features are available on all models.

*Available on 27" and 30" double and single wall ovens. See product specifications for minimum and maximum installation dimensions.
**Among leading brand 27" or 30" wall ovens.

COOKTOPS

Offers flexible cooking options

Whirlpool® electric cooktops simmer, sear and melt quickly and easily with triple radiant elements, bridge elements and our first ever 30" cooktop with five elements. The 17,000-BTU Flex Power™ burner also achieves high heat to quickly boil water.

Boils water in up to half the time*

The Boost function dramatically increases power for greater cooking flexibility and immediate responsiveness. Faster boiling helps you prepare tea, pasta and soup more quickly. You'll even sauté and fry faster, too.

Delivers innovative Induction technology

The Induction cooktop transfers energy directly into any magnetic cookware for faster, more energy-efficient cooking, making it our most energy-efficient cooktop ever. Because the cooking surface cools down fast, spills won't bake onto it.

Precise temperature control

Master your most delicate dishes with the precise temperature control from AccuSimmer® elements and burners. Now you can easily melt butter, cook custards and simmer sauces. The AccuSimmer® Plus element offers more control and reaches lower temperatures.

NOTE: Not all features are available on all models.

*Compared to boiling 3.6 liters of water with a traditional 9" 2,500-watt radiant element or a 12,500-BTU gas burner.

WMH53520AE

MICROWAVES

Adjusts cooking time for optimal results

With the push of a single button, Sensor cooking tracks the progress of your food. It automatically adjusts cooking time as needed so you won't have to micro-manage your microwave.

Senses cooktop heat

Select Whirlpool® microwaves automatically adjust fan speed by sensing cooktop heat. Models with the Auto Adapt fan also offer variable fan speeds so you can match the right amount of ventilation to the dish being prepared.

Seals in flavors and juices

TimeSavor® Plus true convection cooks food evenly with juicy, flavorful results. It uses a rear fan to circulate preheated air over, under and around food so you can roast up to 30% faster than traditional thermal-bake ovens.

Convenient steaming

Enjoy flaky fish, tender vegetables and fluffy rice quickly and easily with Steam cooking. Now you can steam in the microwave for delicious, healthy meals.

NOTE: Not all features are available on all models.

Gourmet Griddle (4396096RB)

An easy-to-clean, non-stick griddle for electric coil, gas and ceramic glass ranges. Place over two elements or burners for great grilled sandwiches or other dishes.

Baking Stone (4378577)

This baking stone evenly distributes heat and moisture for lighter, crispier food. Suitable for use in regular, convection and microwave ovens.

Gas Grate & Grill Cleaner (31617A)

This gentle cleaning formula works great on any porcelain, glass or chrome surface on your gas cooktop.

Stainless Steel Cleaner & Polish (31462A)

Remove grease, grime and fingerprints from your stainless appliances with this specially formulated cleaner.

Touch-Up Paint
White: 72017
Black: 72032
Biscuit: 4392899
Universal Silver: 8212473

Touch up appliance exteriors with this 0.6 fl. oz. bottle of touch-up paint. Includes applicator brush.

Microwave Steamer (8205262RB)

Works in tandem with the Steaming function to conveniently Steam foods such as rice, vegetables and fish with fresh, pleasing results.

Cooktop Care Kit (31605)

Includes everything you need to keep your cooktop clean and protected: a bottle of Cooktop Cleaner, a bottle of Cooktop Protectant and applicator cleaning pads.

All-Purpose Appliance Cleaner (31682)

Cuts through grease and other spills on most appliance and countertop surfaces. The hint of citrus leaves a refreshing scent behind.

Microwave Crisper Pan (W10187336A)

Prepare crisp bacon, potatoes or pizza in the microwave with this pan.

30" Range Oven Rack (W10273852A)

Replace a standard cooking rack in Whirlpool® double oven ranges with this roll-out rack. Its easy-gliding design makes it simple to retrieve dishes from a hot oven.

Heavy Duty Sliding Rack
30" Wall Ovens: W10282973A
27" Wall Ovens: W10282974A

Heavy Duty Sliding Rack with handle
30" Wall Ovens: W10282971A
27" Wall Ovens: W10282972A

Offers enough strength to support two 16-lb turkeys.

AccuBake® temperature management system
Achieve uniform baking results every time with the AccuBake® temperature management system. A built-in sensor monitors oven temperature and controls the cooking elements to deliver consistent, delicious results every time.

AccuSimmer® burner/element
Delivers precise temperature control that is perfect for melting chocolate or simmering sauces. The AccuSimmer® Plus element offers more control and reaches your cooktop's lowest temperatures.

AccuSimmer® cycle
Quickly boils liquids in the microwave, then automatically reduces the heat to a delicate simmer to avoid splatters.

AccuWave® power system
Evenly cooks, defrosts, reheats, softens and melts with constant, gentle heat. Thaw chicken without cooking the edges and reheat sauce without splatters.

Add 30 Seconds option
Quickly set the microwave to cook for 30 seconds at 100% power by pressing this button. Or, press it to add 30 seconds to a manual setting that is already in progress.

Adjustable split rack
Remove the rack insert to make room for large items like a turkey or attach it to make a full rack. The insert can also be used on the counter as a cooling rack.

Adjustable time self-cleaning system
Allows for adjustment of the self-clean time in 15-minute intervals, according to your needs.

AquaLift® self-clean technology
Delivers easy and odor-free oven cleaning in only 50 minutes.* Our most energy-efficient self-cleaning cycle available** uses water and low-heat to release baked-on foods from the bottom of the oven. When the cleaning cycle is complete, soils and excess water can be easily removed with a dry towel.

Auto Adapt fan
Automatically adjusts fan speed on microwave hood combinations by sensing cooktop heat.

Bridge element
Increases cooking options via a 700-watt bridge that connects two heating elements. Evenly heat large or oblong pans more easily on the cooktop.

Center griddle
Allows you to warm tortillas, make pancakes or sear fish with a built-in, center griddle.

CleanRelease® non-stick interior
Reduces cleanup effort because of the non-stick interior—an industry first. No special cleaning solutions are required.

Control Bake
This baking mode keeps the broil element turned off, preventing the tops of your food from overcooking, so pies and turkey come out just right.

Control lock
Disables the control panel to avoid unintended use or other changes to your cooking settings.

Convection Conversion
Removes the guesswork from preparing your favorite dishes by automatically converting standard times and temperatures to the convection equivalent.

Convertible ventilation system
Provides added installation flexibility by venting odors outside or recirculating them, depending upon your preference.

Crisper pan with handle
Provides the ideal cookware for pan-frying foods like bacon or potatoes in the microwave. The patented, non-stick design makes cleanup easy.

Custom Broil
Allows you to set your preferred broiling temperature in 5-degree increments. High heat is best for grilling meats, while low heat is ideal for delicate tasks.

Delay Bake
Lets you program the oven to begin cooking at a pre-set time. Prepare food for baking when it's most convenient for you and have dinner ready according to your schedule.

Downdraft vent system
Pulls steam, smoke and odors downward and outside to help clear kitchen air. Conveniently built into select cooktops.

Dual and Triple radiant elements
Provides the space-saving advantage of having two or three elements in one to handle various sizes of cookware. The inner ring is perfect for simmering or quickly boiling water in small pans. The larger outer ring evenly distributes heat to larger pots and pans for better results.

EasyView™ extra-large oven window
Provides better visibility of the oven interior with an extra-large window. Monitor cooking progress without opening the door, keeping oven temperatures steady and undisturbed. Select wall ovens and freestanding ranges feature an improved EasyView™ extra-large oven window for greater visibility when cooking.

Energy Save mode
Similar to the sleep mode on a computer, the Energy Save feature uses less energy compared to ranges without Energy Save. It can be activated to turn off the display after 5 minutes of the range not being used. Press any button and the display becomes active again.

EZ-Vue™ lighting
Provides illumination above the range according to your preference with three brightness settings, including a night-light option. Bulbs change out easily when a replacement is needed.

Filter change indicator light
Informs you when it's time to change the microwave hood combination filter so air stays fresher. No more guessing about when you need to change a filter.

FIT system
Now your wall oven can fit seamlessly into your current cabinet cutout† with this flexible installation system. It provides various options that are designed to effortlessly suit your decor.

Flex Power™ burner
A 17,000-BTU Flex Power™ burner generates the high heat needed for rapid boiling and searing and provides uniform cooking at lower temperatures for your most delicate dishes, making this our most flexible burner ever.

Frameless door design
Permits easy exterior cleaning with a flat, frameless panel. No nooks or crannies to catch crumbs.

Full-width, cast-iron grates
Offers a smooth design for easy cleaning by hand or in the dishwasher. The grates cover the entire cooktop surface, creating the flexibility to place pots and pans anywhere, while the smooth satin finish resists wear and tear.

Grill rack
Provides the ideal setup when using the grill function of a SpeedCook oven or microwave hood combination, allowing you to place food closer to the grill element for faster cooking. Steaks look and taste as if they were cooked under the oven broiler but are ready in less time.

Hidden bake element
Simplifies cleanup with the bake element hidden beneath the oven floor, leaving a smooth interior surface that is easy to wipe clean.

High-speed coil element
Heats up quickly to provide high temperatures for boiling and frying. Chrome drip pans below catch spills for easy cleanup.

Hot surface indicator
Illuminates when the cooktop surface is still hot to the touch—even after the heating element has been turned off.

Induction technology
Transfers energy directly into any magnetic cookware for faster, more efficient cooking. Whirlpool brand's induction technology transfers heat directly to cookware using 25% less energy than traditional ceramic glass cooktops and 58% less energy than traditional gas cooktops.††

Infinite heat controls
Allow for smooth movement of temperature settings, from low to high. Adjust the heat up or down according to your cooking needs.

Kids Menu
Cooks a variety of child-friendly food with preprogrammed cycles that are activated by the simple push of a button. With menu selections like hot dogs and chicken nuggets, children can easily prepare their own pre-game dinners or after-school snacks.

LP Convertible
Can be converted from natural gas to a liquid petroleum fuel source.

Max Capacity recessed rack
Makes room for large items and helps keep food in place while baking.

Melt/Soften cycles
Gently melts foods such as chocolate without cooking (Melt Cycle); gently softens food such as butter without melting (Soften Cycle).

Microwave steamer
Works in tandem with the steaming function to conveniently steam foods such as rice, vegetables and fish with fresh, pleasing results.

Modular cooktop
Allows you to customize the cooking surface according to your needs with gas burners, grill modules and griddle modules.

Most Used cycle
Saves time by remembering and activating your most frequently used Velos® SpeedCook cycle with the simple press of a button.

---

*Based on average cleaning time of self-clean cycle with water and moderate soils.   **Versus traditional self clean cycle.

†Available on 27" and 30" double and single wall ovens. See product specifications for minimum and maximum installation dimensions.
††Based on boiling 3.6 liters of water with a 9" 3,200-watt induction element compared to a traditional 9" 2,500-watt radiant element or a 12,500-BTU gas burner.

No Drip chrome drip bowl
Keeps cooking cleanup to a minimum and keeps spills from getting under the cooking surface.

One touch bake and broil
Automatically sets the oven to 350˚F when the "Bake" button is pushed and 500˚F when the "Broil" button is selected.

Oval burner
An elongated central burner that can match oval-shaped pans and other longer cookware. Ideal for cooking large whole fish or other oversized dishes on the range top.

Oven Hold Warm/Warm Hold/Keep Warm
Uses low heat to keep food warm inside the oven or microwave, so you can keep completed dishes from getting cold while you work on the rest of your meal.

Pop-up downdraft vent
Retracts when not in use. Variable speed fans make adjusting the ventilation easy for every situation.

Power™ burners
Generate the high heat needed for rapid boiling, searing and frying with burners that offer up to 17,000 BTUs.

Power "On" indicator
Provides an illuminated reminder that the cooktop is turned on.

Precise Clean® system
Tracks how long it has been since the last self-clean cycle and suggests just the right cycle time, so the self-cleaning cycle only lasts as long as necessary for optimal cleaning. No harsh chemicals or cleaners are required.

Preheat countdown timer
Keeps track of how long the oven will take to reach the desired baking temperature with a display that counts down the required time or temperature.

Rapid Boil element
A more powerful radiant element brings liquids to a boil quicker and provides cooking flexibility by accommodating various sizes of cookware.

Rapid Preheat option
Preheat the oven 25% faster* with Rapid Preheat. Ideal for single rack baking, this option saves cooking time and energy.

Recessed cooktop
Provides a more aesthetically pleasing profile by lowering the level of the grates.

Sabbath mode
Overrides the oven's automatic shut-off function, keeping it active for hours of uninterrupted cooking, making it possible to use the oven on the Sabbath without turning it on.

Schott Ceran® eco-friendly ceramic glass cooktop
This eco-friendly cooktop is manufactured without the release of hazardous metals into the earth.**

Sealed burners
Cleans up quickly after cooking is complete. No gap between the cooktop and these burners makes for a smooth surface that's easy to clean.

Self-cleaning system (traditional)
Automatically cleans the oven according to a preprogrammed cycle. No harsh chemicals or cleaners are required.

Sensor cooking
Tracks the progress of your food and automatically adjusts the cooking time as needed to deliver optimal results

SpeedCook technology
Cuts cooking time by up to 47% compared to traditional ovens. Microwave technology works with halogen and quartz light energy to grill steaks and bake brownies with real oven results.

SpillGuard™ cooktop
Helps contain messes and makes cleanup easier with the raised-edge design.

Split rack
Remove the rack insert to make room for large or tall items, or attach it to make a full rack.

Staged cooking
Allows you to custom program multiple power levels and cooking durations without keeping watch over the microwave. Ideal for dishes requiring temperature changes mid-cooking, like frozen entrees.

SteamClean option
Clean up every day light spills using heat and only 1-1/4 cups of water—no harsh chemicals or cleaners needed.

Steam cooking
Conveniently steams foods such as rice, vegetables and fish in conjunction with the patented microwave steamer.

Tap Touch controls
Provide a sleek, sophisticated look that is easy to clean. Cooktop controls can be set with a simple touch.

TimeSavor™ convection
Uses a fan in the back of the oven to distribute hot air more efficiently to seal in flavor and juices.

TimeSavor™ Plus true convection
Uses a fan plus a third heating element in the oven or microwave to distribute hot air more efficiently and seal in flavor and juices. Select microwaves use a rear fan to also cut roasting time compared to traditional thermal-bake ovens.

TimeSavor™ Ultra true convection cooking
Achieve exceptional results faster on every rack with TimeSavor™ Ultra true convection. This new convection cooking system offers greater and more efficient air flow so the oven is filled with even heat.

Touch screen controls
Features dozens of step-by-step directions on a digital display for simple, accurate cooking in the microwave.

TruCapture® ventilation system
Removes cooktop smoke, steam and odors from the front two burners with a powerful 4-speed fan and unique, sloped design that vents out the top instead of the front of the unit. Whirlpool brand's most efficient ventilation system.

Universal Silver finish
Resists fingerprints and cleans easily. The Universal Silver painted finish is an affordable alternative to stainless steel.

Velos® SpeedCook oven
Microwave hood combination oven that grills, bakes, steams, microwaves and vents, featuring SpeedCook technology as well as the TruCapture® ventilation system.

Warming drawer
Keeps food warm in a separate, heated drawer. Multiple temperature settings provide flexibility and help ensure that food done ahead of schedule doesn't get cold before the entire meal is ready to serve.

Warm Zone element
Prevents food from cooling while the rest of the meal is being prepared. This low-powered (20–100 watt) fifth element provides added flexibility and convenience.

Washable filter
Dishwasher-safe filters trap unwanted grease and odors and wash easily for re-use.

Whirlpool brand is constantly improving and innovating our products, so the specifications in this catalog are subject to change.

DISHWASHERS

DISHWASHERS

Industry's most energy-efficient dishwashers*
Our eco-friendly dishwashers not only meet CEE Tier 1** standards, they also use less water and energy without compromising performance.† Using our innovative resource-efficient wash system, these ENERGY STAR® qualified models will even save money on utility bills.

Takes the guesswork out of doing dishes
The Sensor cycle automatically selects the right wash and dry settings using two sensors that measure temperature, soil level and load size. It cleans tough soils 35% better†† using the right amount of time, energy and water.

Cleans without soaking or scrubbing
The enhanced PowerScour™ option uses 40 targeted spray jets in a designated wash area to scour away baked-on foods and deliver twice the coverage to clean your large pots and pans.

Flexible capacity
With features like the EZ-2-Lift® adjustable upper rack and EZ Adjustable tines, you'll be able to take advantage of the large 15 place-setting capacity available on select Whirlpool® dishwashers.

NOTE: Not all features are available on all models.

*Based on average annual energy usage among leading brand dishwashers, MSRP $399-$749. **Based on the Consortium for Energy Efficiency qualifying product lists. Visit cee1.org for more information. †Compared to a conventional dishwasher manufactured before 2006. ††Compared to previous wash system.

Small Items Basket (3370993RB)

Fits all Whirlpool® dishwashers. It holds baby items, jar lids and other small utensils that would normally slip through the dishwasher rack.

DishTrick® Capacity Extension Bundle (DISHEXTEND)

Clean large utensils and other odd-shaped items with this kit. Includes 6 light item clips, a side clip, a side utensil clip and a silverware basket.

Swivel Gooseneck Fitting (W10273460)

Space-saving 90° design makes this ¾" x ⅜" elbow hose fitting perfect for easy dishwasher installation. A ⅝" brass compression fitting is included.

DishTrick® Baby Bundle (DISHBABY)

Makes cleaning nipples, straws, silverware and bottles easy. Includes a small items basket, a baby bottle brush and 8 small item clips.

12' Drain Hose (3385556)

This flexible drain hose for tall tub dishwasher models offers a no-kink design made for hot water.

DishTrick® Wine Enthusiast Bundle (DISHSTEM)

Perfect for safely cleaning wine glasses in the dishwasher. Includes a StemGrip™ accessory (holds 2–4 stemware pieces) and a stemware brush.

Small Items Bag (8519716)

Holds extra-small utensils, contact cases and other small items that would normally slip through the dishwasher rack.

affresh® Dishwasher Cleaner (W10282479)

Uses environmentally safer ingredients to help remove filming and spotting. Pouch contains 6 tablets.

3-Prong Dishwasher Power Supply Kit (W10278923RP)

This straight, 6', 90° UL-listed power cord kit fits dishwashers from most major brands and includes a power cord, metal strain relief bracket, wire nuts and instructions.

White Dishwasher Rack Repair Kit (4396838RC)

This kit has everything you need to repair your dishwasher rack tines. It contains 150 tine tips, a 4-oz bottle of vinyl touch-up paint/adhesive with a brush and instruction sheet.

Hoses and Cords

Hoses include brass elbow, brass swivel and gooseneck fittings.

*Trim Kit accommodates both a framed and frameless custom panel design. 6" custom panels for models WDF310PAA and DP1040XTX are not available at this time.
**Stainless steel Tall tub models only.

1-Hour Wash cycle
Thoroughly cleans your dishes in nearly half the time.* This hour-long cycle lets you thoroughly clean your dirty dishes when you are in a rush.

ADA height compliant
Select dishwashers with this designation meet ADA height requirements and must be installed in compliance with ADA Standards.

Adjustable upper rack
Manually raise or lower the upper rack to better fit tall items.

AnyWare™ Plus silverware basket
Designed to clean better and fit in four places for maximum flexibility, the improved AnyWare™ Plus silverware basket rests on the bottom rack, the front of the lower rack or in the door for 100% usable rack space. It even makes room to hold up to 12 more pieces of silverware.

Auto soil sensor
Optimizes every cycle for reliable cleaning results. This sensor measures water clarity to determine how dirty dishes are, then adjusts the cycle accordingly. It measures the soils in the water and will add extra water and temperature to ensure clean dishes.

CEE Tier standards
Based on the Consortium for Energy Efficiency (CEE) qualifying product lists—with the Tier 1 standard being the most efficient. Visit cee1.org for more information.

Clean & Quiet Guarantee
If you are not completely satisfied that your new Whirlpool Gold® dishwasher is quieter and cleans better than your previous model, Whirlpool Corporation will take it back within 30 days of the date of purchase and refund the full price to you. Visit whirlpool.com for complete details and qualified models.

Clean Touch™ console
Select Whirlpool® trash compactors feature a smooth console with no dials or switches that cleans easily.

Control lock
Disables buttons on the control pad to help prevent accidental operation or children from starting or stopping the dishwasher.

Cup shelf
Allows you to stack two levels of coffee mugs or to secure delicate glassware when used as a stemware holder during the wash cycle.

Delay Wash option
Wash dishes according to your schedule. This option lets you delay washing for up to 8 hours until off-peak hours when utility rates may be lower.

Dynamic fills
The dishwasher monitors water level and ensures the correct amount of water is used for each load. All cycles include dynamic fills that change for every cycle and within the cycle.

Easy Rollers™ installation wheels
Easily position your Whirlpool® compactor where you need it with the Easy Rollers™ installation wheels.

Eco Dry option
The industry's first Eco Dry option is the most efficient drying option on our dishwashers** because it uses 70% less energy compared to using Heated Dry.

Eco Wash cycle
Our most efficient dishwasher cycle helps minimize energy and water usage while cleaning dishes.** It is great for cleaning lightly to moderately soiled dishes.

ENERGY STAR® qualified
Exceeds government standards to help conserve natural resources and save money on utility bills.

EZ-2-Lift™ adjustable upper rack
Easily adjust the upper rack 2" up or down to fit larger items in either rack. Improved to allow for 100% usable upper rack space, our easiest to adjust racks can be lifted or lowered to accommodate different size items and feature a narrow profile that doesn't interfere with loading.

EZ Adjustable tines
Innovative sliding lower-rack tines move left or right to fit your dishes. Now you have twice the space between tines to fit larger bowls for optimal cleaning.

Fold-down tines
Secure dishes during the wash cycle or can be folded down to create space for larger items.

Fully integrated electronic controls
Add a modern accent to your kitchen with a control panel that's hidden away and provides a sleek exterior while preventing unwanted cycle changes or accidental operation.

Heavy cycle
Adds more time to the cycle to clean heavily soiled items.

High Temperature Wash option
Choose this option when additional cleaning of items like baby bottles, glassware or dishes is required.

Light item clip
Secures lightweight items during the wash cycle and helps prevent items from falling out of the basket. They also stop cups and other small containers from flipping over and filling with water.

New PowerScour™ option
The new PowerScour™ option uses 40 targeted spray jets in a designated wash area to scour away baked-on foods without soaking or scrubbing. From casserole dishes to pots and pans, this option delivers twice the coverage to clean large items.

Normal cycle
Use for loads with normal amounts of food soil. This cycle is great for everyday loads.

NSF Certified Sani Rinse option
Sanitizes dishes by eliminating 99.999% of food soil bacteria, as certified by NSF International.

Nylon racks
Durable nylon coating helps resist rust and prevent scratching.

Overnight cycle
This industry-exclusive cycle quietly soaks your dishes with an extended prewash and then runs a tough soil wash to clean dirty dishes.

Quiet Partner™ sound packages
Whirlpool brand dishwashers offer many levels of sound-reducing insulation. The Quiet Partner™ IV sound package is the highest available.

Resource-efficient wash system
Efficiently cleans a full load of dishes using nearly half the water and energy.† This system provides excellent cleaning first in the upper rack, then the lower, to reduce the amount of water used.

Sensor cycle
Automatically selects the right wash and dry settings for your load by using two separate sensors to measure temperature, soil level and load size once during the prewash and once during the wash cycle. It cleans tough soils 35% better†† using just the right amount of time, energy and water.

SheerClean™ wash system
Channels water up and out of the back and top of the dishwasher to powerfully clean from multiple angles. The filter keeps wash water clean and delivers sparkling-clean dishes.

Slate interior
Reduces the appearance of visible tub stains, wash after wash. Sophisticated slate styling gives the dishwasher an attractive, premium look.

Soak & Scour option
Gently soaks, powerfully cleans and then soaks again to remove tough soils from dishes so you don't have to.

Stainless steel interior
Adds a sleek, smooth texture to the interior of the dishwasher. Stainless steel provides higher heat retention to further improve drying performance, while also offering a high-end look.

Tall tub design
Allows you to load tall and odd-shaped items in both racks. An additional 3" of interior space compared to standard tub models makes room for extra-large items in the lower rack and plates or sports bottles in the upper rack.

Top Rack Wash option
Save time and energy with the Top Rack Wash option. It washes the top rack of dishes, so you don't have to wait for a full load to wash a few items.

Touch-Toe™ drawer opener
Easily open Whirlpool® trash compactors without your hands using the Touch-Toe™ drawer opener. A light tap of the toe is all that's needed to release the drawer.

*Based on the Consortium for Energy Efficiency qualifying product lists. Visit cee1.org for more information.
**Meets ADA height requirements and must be installed in compliance with ADA Standards.

⚠ WARNING

Electrical Shock Hazard
Disconnect electrical power at the fuse box or circuit breaker box before installing dishwasher. Failure to do so can result in death or electrical shock.

Electrical requirements

Rated load is 11.0 amps, 120 volts, 60 Hz AC.

15-amp (20-amp max) circuit required.

When local codes permit, any Whirlpool® dishwasher plus a disposer up to 7.2 amps can be installed on a single 20-amp circuit. Do not use an extension cord.

Water Pressure — 15 to 120 psi.

Recommended incoming water temperature — 120ºF minimum.

Listed by Underwriters Laboratories.

VIDEO

LAUNDRY
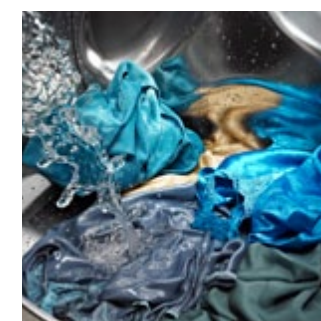

HIGH EFFICIENCY FRONT LOAD LAUNDRY

Sprays detergent evenly

Active Spray technology cleans better by spraying the load with detergent in a cone-shaped pattern to completely and evenly cover fabrics. It delivers better cleaning performance that virtually eliminates the need to pretreat.

Cleans better with less detergent

Precision Dispense Ultra senses and adapts to each load, adding bleach and fabric softener at just the right time during the cycle. The removable detergent reservoir can hold enough detergent for up to 12 loads of laundry in a single filling.*
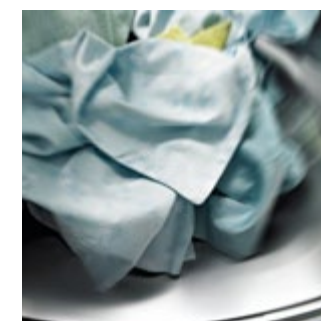

Keeps clean clothes fresh

When the FanFresh® option with Dynamic Venting Technology® is activated, select models automatically tumble clothes for up to 12 hours until you're ready to toss them in the dryer. You can even wash and dry a small load right in the washer.**
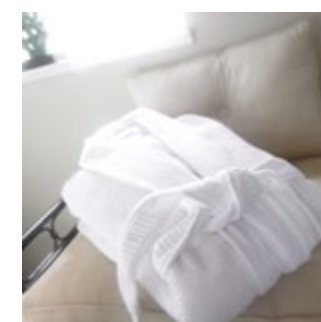

Automatically stops when items are perfectly dry

Advanced Moisture Sensing uses built-in sensors to read incoming and outgoing air temperatures, while monitoring moisture levels inside the dryer. This helps the drying cycle end when everything is perfectly dry, saving time and energy and preventing overdrying.

NOTE: Not all features are available on all models.

*Based on 2X concentration of HE detergent.   **Based on a 2-lb load of lightweight fabrics.

HIGH EFFICIENCY TOP LOAD LAUNDRY

Best care for your clothes*

The Clean Care cycle beautifully blends cold water with adaptive wash actions to help remove stains and protect your clothes from color fading and bleeding. Advanced Moisture Sensing in the dryer automatically keeps heat consistent to help prevent overdrying and shrinking.

Industry's most resource-efficient top load pair**

Save time, money and energy with an ENERGY STAR® qualified washer and high-efficiency dryer. These laundry pairs more than pay for themselves, saving you over $3,100 in lifetime water and energy costs.†
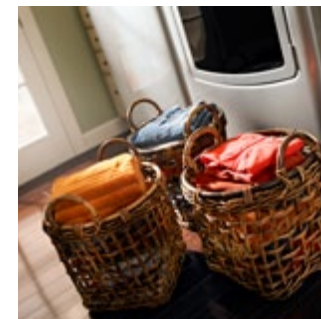

Industry's largest capacity pair††

Wash up to 3 baskets of laundry in a single load with this 4.6 cu. ft. washer. Then, transfer your laundry to the 7.6 cu. ft. dryer that easily adapts to both small and large loads for optimal fabric care.
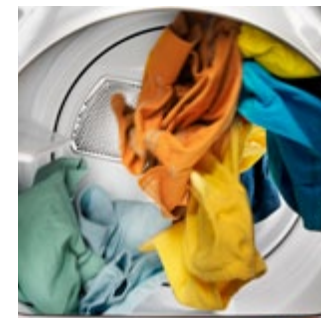

Stops drying when items are ready

Whirlpool brand brings high efficiency to the dryer with Advanced Moisture Sensing and the AccuDry™ and AccelerCare® sensor drying systems. HE Cabrio® dryers save time and energy by monitoring moisture levels and ending the cycle when everything is dry.

NOTE: Not all features are available on all models.

*Among leading top load brands, based on cleaning, gentleness and efficiency in the washer and lower fabric temperatures in the dryer. **Compared to other leading brand top load pairs, based on equal weighting of energy and water usage, using eco cycles/options. †Compared to a pre-2004 traditional washer and non-sensor dryer, based on normal cycle, average use. 11-year washer life, 12-year dryer life, electric dryers only. ††Among leading brand top load pairs, based on combined washer and dryer cu. ft.

TRADITIONAL TOP LOAD LAUNDRY
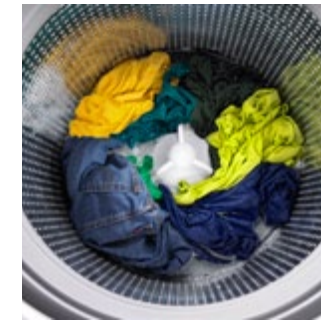

Saves money on utility bills

Top load washers that meet CEE Tier 3*
standards and feature the $H_2Low^{™}$ wash
system save over 300 gallons of water per
week** and more than $1,400 in lifetime water
and energy costs.† They also provide superior
cleaning using less water by automatically
sensing the size of each load.
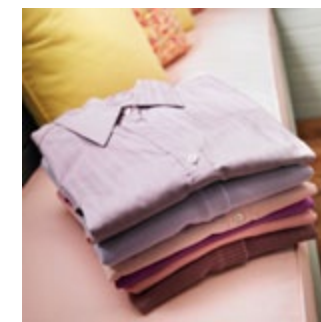

Cleans better using lower temperatures

Protect your wallet and the environment. The
EcoBoost™ option uses a lower temperature
to provide excellent cleaning while reducing
your overall utility costs.

Tracks progress

All Whirlpool brand traditional washers let
you clearly see which part of the cycle your
washer is running, including Sensing, Wash,
Rinse, Spin, Done and Lid Lock.
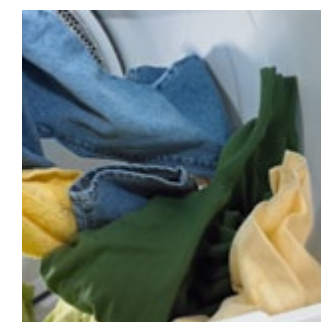

Uses less energy

The AccuDry™ drying system uses less
energy than dryers equipped with the
AutoDry™ system,†† helping to lower your
monthly water and electric bills. The
system reduces overdrying by monitoring
moisture levels and temperatures.

NOTE: Not all features are available on all models.

*Based on the Consortium for Energy Efficiency qualifying product lists. Visit cee1.org for more information. **Compared to pre-2004 traditional
top load washers using normal cycle. †Compared to pre-2004 traditional top load washers, based on average use, 11-year average life, model

affresh® Washer Cleaner (W10135699)

Effectively remove odor-causing residue from your washer while cleaning mold and mildew stains, too. Includes three tablets.

Precision Dispense Ultra HE Detergent Dispenser (W10250743A)

Adds the right amount of detergent based on load size and soil level. Extra dispenser provides flexibility in changing detergent.

Front Load Dryer Door Reversal Kit All colors - 8579666ARP (Models: 9470W and 9550W)

Open your front load dryer from either the left or right side with this easy-to-use door reversal kit. (No kit needed for models 94HEA, 96HEA and 97HEX)

Washable Delicates Bag (W10180464RP)

Protect delicate items from snags, tangles and tears while machine washing and drying.

Industrial-Grade Washer Hoses
8212638RP: (2) 6' Nylon Braided w/90º elbow
8212487RP: (2) 5' Nylon Braided
8212545RP: (2) 5' Red & Blue EPDM
8212656RP: (2) 10' Black EPDM
8212546RP: (2) 4' Black EPDM
8212641RP: (2) 5' Black EPDM

Industrial strength hoses safely and efficiently transport hot and cold water to the washer.

Laundry 1-2-3™ Adjustable Clothes Rack (XHS1000XX)

Hang garments straight from the washer or dryer with this clothes rack. It's also collapsible for quick, easy storage.

Front Load Stack Kits
8541503 (Models: 9470W and 9550W)
W10298318RP (Models: 94HEA, 96HEA and 97HEX)

Install a front load dryer on top of its matching washer with this stack kit.

Compact Model Stack Stand (49971)

Install compact dryer model LER3622P on top of the LCE4332P compact washer model with this stack stand.

Dryer Lint Brush (8212614)

Extend dryer life, lower utility bills and reduce drying time by regularly and thoroughly removing lint with this cleaning brush.

Top Load Washer/Dryer Cover (W10214580RP)

Protect your top load washer or dryer from environmental damage with this gray cover. The cover also cleans easily with a damp cloth.

Dryer Racks
W10322470A (Models: 94HEA, 96HEA and 97HEX)
W10121663 (Models: 9470W and 9550W)
8212450A (Models: 5500X, 5600X, 5700X and 5700A)
3406839 (Model: 4800X)

The dryer rack is convenient for flat items such as sweaters and hats, or for bulky items like footwear and stuffed animals. A quick and easy insertion of this lightweight rack means tumble-free drying.

To acquire pricing information, order Whirlpool® laundry accessories and determine delivery time, visit whirlpool.com/accessories or call 1-800-462-3819.

· (1) 4' pipe section attached to (1) close elbow
· (1) 4' pipe section attached to (1) wall-offset elbow
· (1) Extension collar
· (2) Clamps for wall and dryer connection
· Installation instructions

*Refer to Use & Care Guide for specific model. **Maximum length of 4" diameter rigid metal duct and flexible metal duct.

AccelerCare® drying system
Built-in sensor strips and computer intelligence combine to sense how fast the load is drying, how hot the air should be and when your clothes are dry, stopping the cycle automatically to help prevent overdrying and shrinking.

AccuDry™ drying system
Measures moisture and temperature levels to reduce overdrying and automatically stop the cycle when the load is dry. Dryers with the AccuDry™ system use less energy than Whirlpool® top load dryers equipped with the AutoDry™ system.*

Active Spray technology
Sprays the load with detergent in a cone shaped pattern to completely and evenly cover the fabrics.

Adaptive Clean wash system
Keeps clothes looking newer longer** by combining the right amount of wash action and detergent with the Care Control temperature management system.

Adaptive wash actions
Up to 16 different adaptive wash actions, from rocking to tumbling, adapt to the cleaning needs of each load. These adaptive wash actions provide a combination of powerful cleaning and gentle fabric care, handling everything from heavily soiled jeans to delicate silks.

Advanced Moisture Sensing
Whirlpool brand's most advanced drying system uses built-in sensors to read temperature and moisture levels, so the drying cycle can end when everything is thoroughly dry, saving time and energy.

Allergen cycle
Remove up to 95% of common allergens from your clothes with the Allergen cycle.[†] Select models feature an Allergen cycle certified by NSF International.

AutoDry™ drying system
Automatically senses when clothes have reached the right temperature and stops the cycle to save energy.

Care Control temperature management system
Adjusts the cold and hot water inlets to reach temperatures that are warm enough to dissolve detergents. Water is kept from overheating to help reduce shrinking and color bleeding.

CEE Tier standards
Based on the Consortium for Energy Efficiency (CEE) qualifying product lists—with Tier 3 being the most efficient. These models feature advanced water and energy savings and may qualify for rebates from local utility companies. Visit cee1.org for more information.

Clean Care cycle
Provides the best care for your clothes,[††] using adaptive wash actions together with a concentrated solution of HE detergent and cold water to gently lift stains and soils from fabrics.

Clean Washer cycle with affresh® Washer cleaner
Deep-fills the washer to clean areas that low-water systems don't typically reach. All it takes is one cup of bleach. Using affresh® Washer cleaner also effectively eliminates odor-causing residue and cleans mold and mildew stains.

Deep Clean option
Penetrates deep into fabric fibers, breaking down and dissolving stains without pretreating. Select models add steam enhancement for even better cleaning.

Delay Wash
Sets the washer to begin cleaning up to 18 hours later, during off-peak hours when utility rates may be lower or when unloading the washer is more convenient.

Direct drive motor
Handles larger capacity loads, enhances the spin speed for improved energy savings and uses fewer moving parts so there's less wear and tear over time.

Direct Inject wash system
Automatically senses the size of each load to use just the right amount of water and deliver great cleaning. The system also delivers more gentle performance.

EasyView™ glass lid
A see-through glass lid allows you to look inside and see the wash action while the load is in progress. The frameless design also offers a larger viewable area. Select models also feature a Smooth Close lid that opens and closes easily without slamming.

EcoBoost™ option
In the washer, this option uses a lower temperature and increased spin speed or mechanical action to provide excellent cleaning and reduce your overall energy use. In the dryer, this option saves energy by using less heat and an increased cycle time.

Eco Monitor
Allows you to see how the cycles and options you choose will affect your overall energy savings in both the washer and the dryer.

Eco Normal cycle
Saves up to 40% dryer energy when paired with a matching Duet® or Cabrio® washer, compared to a traditional top load laundry pair.*

ENERGY STAR® qualified
Meets government standards to help conserve natural resources and save money on your utility bills.

FanFresh® option with Dynamic Venting Technology®
After the wash cycle, the FanFresh® option's built-in washer fan circulates air in the washer, keeping your clean clothes fresh and free from odors for up to 16 hours. When activated, select models will automatically tumble clothes for up to 12 hours. You can even wash and dry a small load right in the washer.[‡]

H₂Low™ wash system with Auto Load Sensing
High-efficiency top load washer models feature a wash system that uses less water per load while delivering better cleaning performance and gentleness than a traditional top load washer.

High efficiency (HE) sensor drying
Whirlpool brand brings high efficiency to the dryer with models featuring AccuDry™ and AccelerCare® sensor drying systems. Select models with Advanced Moisture Sensing also save energy and deliver the best care for your clothes[‡‡] by adjusting dry time and temperature as needed and stopping the cycle when clothes are dry.

Laundry Apps
The full-color widescreen LCD interface on select Duet® washers and dryers offers a full suite of Laundry Apps that includes Stain Assist, Hints & Tips and Before You Call. Up to 14 specialized washer and dryer cycles handle the most difficult jobs and can even be customized to best wash and dry the kinds of fabrics you launder most frequently.

NSF Certified sanitization cycles/options
Eliminate 99.9% of certain household bacteria.[¥] Sanitization cycles and temperatures on Duet® washers add this benefit, while select Duet® Steam dryers also feature an NSF Certified Sanitize cycle.

Oxi Dispense option
Enhances whitening performance with an eco-friendly alternative to bleach. An automatic dispenser distributes the oxygenated additive at the appropriate time, sending oxygen through the load to brighten fabrics.

Precision Dispense
Penetrates stains and pretreats soils with a concentrated burst of detergent. The wash cycle begins only after the entire load has been treated. Plus models add the ability to release oxy additives while Ultra models can hold enough 2X concentration HE detergent for up to 12 loads of laundry in a single filling.

Quad dryer baffles
Four shorter, staggered baffles increase the effectiveness of the dryer and promote better, more even tumbling.

Quick Wash/Dry cycle
Designed to clean or dry small, lightly soiled loads in less time using increased spin speeds to extract more water. The Quick Dry cycle even allows you to finish drying a load in as little as 13 minutes.

Quiet Spin technology
Install your laundry pair on a second floor and be assured of great out-of-balance performance and vibration control. Quiet Spin 360 technology's dual-ring ball-balancing system makes it our highest level of vibration control.

Quiet Wash/Dry noise reduction systems
Keep operational sounds inside the washer and dryer and out of living areas with sound-absorbing materials around the wash basket and dryer drum. Escalating levels of sound reduction are available, up to Quiet Wash Ultra and Quiet Dry Ultra.

Reduce Static/Static Reduce option
Uses tumbling and a spray mist in the dryer to evenly reduce the amount of static in an entire load of clothes.

SilentSteel™ dryer drum
Forget about the sound of metal buttons and zippers making noise as they tumble, thanks to a unique sound-dampening material that surrounds the stainless steel dryer drum. The dryer runs quieter, even when you load items with metal accents.

Stainless steel washer and dryer drum
The drum's stainless steel construction has a smooth surface that resists odors, rust and chipping and helps prevent fabrics from snagging or tearing.

Steam technology
In the washer, steam breaks down and dissolves tough stains without pretreating. In the dryer, features like the Enhanced Touch Up Steam cycle and Quick Refresh Steam cycle combine mist with heat to create steam to relax wrinkles and refresh dry clothes. Whirlpool® steam dryers also feature a Y-connector so you don't have to add water manually before starting a steam cycle.

Tap Touch controls
Allows direct access to washer and dryer functions, and its sleek appearance enhances the appeal of any space.

TumbleFresh™ option
Activates after the wash cycle is finished and rolls clean clothes periodically to help prevent wrinkles from setting in. Clothes stay fresh without having to transfer them to the dryer immediately.[¥¥]

Wrinkle Shield™/Wrinkle Shield™ Plus option
Tumbles the dryer every 5 minutes after the cycle is complete to help prevent wrinkles from setting into clean, dry fabrics. The intermittent tumbling can continue for up to 150 minutes (based on the model), or until the door is opened and the load is removed. Select dryer models add steam to the tumbling for improved results.

Xtra Roll Action™ Plus agitator
Brings your laundry to the bottom of the wash basket where cleaning takes place. It can effectively roll over and clean twice the average size load (based upon a 7-lb average load size).

---

*Electric models only. **Compared to traditional top load washers. †Allergens tested were dust mites and pet dander.
††Among leading top load brands, based on cleaning, gentleness, and efficiency. ‡Based on a 2-lb load of lightweight fabrics.

‡‡Among leading top load brands, based on advanced sensor drying and lower fabric temperatures in the dryer. ¥Bacteria tested were *K. pneumonia, P. aureginosa and S. aureus*.
¥¥Intermittent tumbling in the washer helps reduce the growth of odor-causing bacteria.
