WELCOME TO A NEW ERA FOR KITCHENS

MAJOR APPLIANCE CATALOG

INTRODUCING THE
FIRST KITCHEN TO
CREATE THE INCREDIBLE,
STIR UP JOY AND
ELEVATE EXPECTATIONS.

KitchenAid® has just reimagined what a cook's kitchen can be. From the superior performance that enhances everything you cook to a design that elevates the look, it marks the beginning of a new era for kitchens.

Because when you can expect the incredible, there's so much more to make.

NAPA VALLEY

RECLAIMED

A COMING OF AGE IN KITCHEN DESIGN

The redesigned new line of KitchenAid® Appliances boldly blends professionally-inspired styling with sleek touches for the home. Every thoughtful detail combines beauty with superior functionality, from the secure grip on the Satin Texture Handles to the KitchenAid Brand Medallions that speak to our craftsmanship. Our appliances were designed with one simple purpose, to inspire your next dish.

CHEFS CHOOSE
KITCHENAID FOR THEIR
HOMES MORE THAN ANY
OTHER BRAND*

COOKING

COOKING

What drives a creative cook? That's the question we asked professional chefs, passionate home cooks and design experts from across the globe to answer. We used them as the inspiration when crafting our cooking appliances into something much more than just machines. We created the first line of cooking appliances to stir emotion.
BUILT-IN WALL OVENS AT A GLANCE

EASYCONVECT™ CONVERSION SYSTEM

takes the guesswork out of convection cooking by ensuring exceptional results when experimenting with new recipes or familiar favorites (select models).

PRECISION TOUCH CONTROLS

offer exceptionally modern easy-to-use displays that put sophisticated functions right at hand.

SATIN TEXTURED HANDLES

are inspired by professional kitchens. The sturdy bar handle shape, sleek chrome caps and easy-to-clean, satin cross-hatch texture combine high-style with a secure grip.

KITCHENAID® BADGE

puts our bold emblem on every appliance, with thoughtful details like polished edges and recessed letters.

SELF-CLEANING CYCLE

uses high temperature to power through soils in the oven cavity, requiring only a quick wipe down at the end of the cycle.

CHROME INLAID FRAME

creates a beautifully finished transition by adding a chrome accent between glass and brushed metal surfaces (select models).

SIZE AND CONFIGURATION OPTIONS

DOUBLE WALL OVEN

Double wall ovens provide the flexibility to cook dishes at different temperatures simultaneously.

30-INCH
27-INCH
24-INCH

COMBINATION MICROWAVE WALL OVEN

Combination microwave wall ovens feature an upper microwave oven and full-size lower oven.
30-INCH
27-INCH

SINGLE WALL OVEN

Single wall ovens offer versatile installation options—in a wall, a cabinet or under a counter.

30-INCH
27-INCH
24-INCH

EVEN-HEAT™ TRUE CONVECTION

This feature produces flawless results. The unique bow-tie design with dedicated heating element and convection fan ensure the inside of the entire oven is heated to, and stays at, the perfect temperature.

TRUE CONVECTION

A specially designed heating element helps provide even temperature management. The fan draws air in, past the heating element, and back into the oven.

EVEN-HEAT™ OVENS WITH THERMAL BAKE/BROIL

This feature cycles the bake and broil elements to maintain the perfect temperature for baking, broiling and roasting.

INSTALLATION OPTIONS

NEW TO BUILT-IN WALL OVENS: FLUSH CABINET INSTALLATION

Single and double wall ovens with the FIT System help create a seamless fit inside an existing cabinet cutout of compatible width and configuration.

UNDERCOUNTER INSTALLATION

Installing a single wall oven under the counter helps maximize counter and cabinet space in the kitchen.

COMPLEMENTARY PRODUCT PAIRINGS

WALL OVEN ABOVE
A WARMING DRAWER

Installing a warming drawer beneath a wall oven adds flexibility to meal preparation. Take finished dishes right from the oven to the warming drawer to keep them warm until they are ready to be served.

SINGLE WALL OVEN
BELOW A COOKTOP

Our single wall ovens can be installed below many KitchenAid® Cooktops. This design conveniently brings cooking appliances together in one area of the kitchen.

COOKTOPS
COOKTOPS AT A GLANCE

EVEN-HEAT™ SIMMER BURNER
uses a diffuser plate to allow more control of the flame at the lowest setting, for more precise simmering and melting.

FULL-WIDTH CAST-IRON GRATES
enhance the beautiful look of the cooktop and allow easy movement of cookware around the entire cooking surface.

COOKSHIELD FINISH
protects the cooktop from stains that may occur with high-temperature cooking (select models).

MULTI-FINISHED KNOBS
feature a brushed metal surface offset by sleek chrome and a satin cross-hatch texture for a high-style, non-slip touch. Even more precision is provided by the bladed dial (also available back-lit on select models).

PROFESSIONAL DUAL RING BURNER
allows you to go from one small flame for precise simmering to a dual flame for powerful boiling, all on the same burner (select models).

OR

MULTIFLAME BURNER
works as an all-purpose professional burner, providing the ability to use both high- and low-temperature cooking methods so you can go from a boil to a simmer without changing burners (not pictured, select models).

EVEN-HEAT™ TORCH BURNER
features an exclusive design that provides a small flame for delicate simmering and a larger one that distributes high heat across the whole pan for more even cooking.

SIZE AND CONFIGURATION OPTIONS

GAS COOKTOPS

36-INCH WITH 5 BURNERS
30-INCH WITH 4 OR 5 BURNERS
30-INCH WITH DOWNDRAFT

INDUCTION COOKTOPS

36-INCH WITH 5 ELEMENTS
30-INCH WITH 4 OR 5 ELEMENTS

ELECTRIC COOKTOPS

36-INCH WITH 5 ELEMENTS
36-INCH WITH DOWNDRAFT
30-INCH WITH 4 OR 5 ELEMENTS
30-INCH WITH DOWNDRAFT
15-INCH WITH 2 ELEMENTS

DOWNDRAFT

Instead of requiring an overhead vent, gas and electric cooktops with a built-in downdraft ventilation system draw smoke, steam, and odors directly from the cooktop, then out of the kitchen through ductwork in the cabinet below.

COOKING STYLES

GAS

Gas cooktops feature either four or five burners in 36- or 30-inch widths. All of these models include burners with a variety of heat outputs. Easily accomplish any task—from melting and simmering to stir-frying and sautéing—and move cookware between burners effortlessly on full-width, cast-iron grates.

INDUCTION

Induction technology generates heat directly in magnetic cookware, making the cookware the heat source instead of a burner or element. This provides precise, responsive heating and cooling similar to a gas cooktop with a smooth ceramic-glass surface that allows for effortless cleanup.

ELECTRIC

KitchenAid® Electric Cooktops with Even-Heat™ Technology feature energy-efficient elements that ensure a consistent level of heat for exceptional boiling, simmering and melting. Triple- and/or double-ring elements allow cooks the versatility to select the appropriate element based on cookware size. In addition to exceptional performance, KitchenAid is one of the only brands to feature die-cast knobs on select models.

STAINLESS STEEL
WITH CAST-IRON GRATES

Move cookware between burners easily on the full-width cast-iron grates that accent this attractive surface. Their durable, heavy-duty construction ensures a lasting beauty, meal after meal.

GAS-ON-GLASS

Found on select gas cooktops, the sleek gas-on-glass surface matches any kitchen décor and is exceptionally easy to clean. (Black option shown. White option available on select models.)

PREMIUM SURFACE WITH WATERMARK

Our induction and electric cooktops feature an attractive watermark pattern that adds to the elegance of the sleek, easy-to-clean, ceramic-glass surface. 36- and 30-inch models feature either die-cast metal control knobs or touch-activated controls.

PURE COLOR

This surface, found on select electric cooktops, comes in saturated colors with stainless steel control knobs for a sophisticated appearance.
TRADITIONAL

Traditional electric cooktops feature metal control knobs that accent the speckled black, ceramic-glass surface.

Important: Induction cooktops require that you use cookware with magnetic properties. If a magnet sticks to the bottom of a pan, the cookware is induction compatible. Visit KitchenAid.com to find cookware options that fit the way you cook.

SIZING TO MATCH THE COOKING SURFACE

EQUAL WIDTHS

For cooktops or ranges installed against a wall or in an island or peninsula, the ventilation system should be at least the same width as the cooking surface for satisfactory performance.

COOKING SURFACE

WIDER VENTILATION SYSTEM

Wall-mount hoods provide highly efficient venting with a range of CFM and design options that make them compatible with a variety of cooking appliances.

COOKING SURFACE

400 CFM / 65K BTU THRESHOLD allows installation over any KitchenAid® regular 36- or 30-inch range or cooktop with outputs up to 65K BTU (on select models).

NEW PERIMETER VENTILATION increases ventilation system efficiency by pulling air from the edges of the hood and speeding up the movement of air at the center, allowing it to efficiently handle up to a 65K BTU total output. So go ahead and give it more garlic (on select models).

30-INCH

STYLE OPTIONS

ISLAND-MOUNT CANOPY HOODS

Island-mount canopy hoods fit well in any kitchen design and are the perfect complement to a cooktop or range installed in an island or peninsula.

WALL-MOUNT CANOPY HOODS

Wall-mount canopy hoods provide highly efficient venting with a range of CFM and design options that make them compatible with a variety of cooking appliances.

SPECIALTY SLIDE-OUT VENTS

Specialty slide-out vents feature a stylish glass canopy but remain out of sight when not in use.

STYLE OPTIONS

UNDER-CABINET SYSTEMS

Under-cabinet systems allow you to hide ductwork in the cabinet above or the wall behind.

RETRACTABLE DOWNDRAFT SYSTEMS

A popular choice for islands and peninsulas, these retractable downdraft systems are often referred to as "pop-up" hoods, as they remain flush with the cooktop surface until needed.
CUSTOM HOOD LINERS

Custom hood liners offer commercial-style performance for custom applications. The liner can be mounted inside a decorative hood created from the material of your choice.

INSTALLATION OPTIONS

FULL-WIDTH CHIMNEY COVER

A full-width chimney cover is an aesthetic solution that effectively bridges the gap between a vent hood and the ceiling, enclosing the ductwork.

CHIMNEY EXTENSION KIT

An optional chimney extension kit provides additional chimney height to accommodate high ceilings.

CONVERSION TO RECIRCULATING VENTILATION

If you can't run ductwork out of the kitchen, you can use a kit to convert to recirculating ventilation.

WARMING DRAWERS AT A GLANCE

KITCHENAID BRAND MEDALLION

is our iconic finishing stamp: a mark of craftsmanship and precision with a stylish touch of red.

SLOW COOK FUNCTION

adds versatility by allowing you to use the warming drawer in the same way you would use a countertop slow cooker.

CUSTOM-CONTROL TECHNOLOGY

takes the guesswork out of selecting the proper temperature for different applications.

SENSOR TEMPERATURE CONTROL

helps prevent food from drying out by keeping the warming drawer at a consistent temperature.
KITCHENAID® BADGE

puts our bold emblem on every appliance, with thoughtful details like polished edges and recessed letters.

SATIN TEXTURED HANDLES

are inspired by professional kitchens. The sturdy bar handle shape, sleek chrome caps and easy-to-clean, satin cross-hatch texture combine high-style with a secure grip.

INSTALLATION OPTIONS

BELOW A DOUBLE WALL OVEN

Adding a warming drawer below a wall oven gives bakers an additional option for proofing bread.

*Panel ready only.
 Panel and handle sold separately.

BELOW A COMBINATION MICROWAVE WALL OVEN

The warming drawer has a slow cook function that means a dish can begin cooking early in the day and be ready to eat as soon as other dishes finish cooking in the combination microwave wall oven.

BELOW A BUILT-IN MICROWAVE OVEN

A warming drawer below a KitchenAid® Built-In Microwave Oven provides two options for keeping finished dishes at their serving temperature before guests arrive.

BELOW A COOKTOP

As a sauce or side dish is being prepared on the cooktop, the warming drawer can keep a main dish warm and at the ideal humidity level.

Additional installation options include two warming drawers positioned side-by-side or stacked, or a warming drawer below a counter.

MICROWAVE OVENS AT A GLANCE

STAINLESS STEEL CAVITY
extends the beauty and easy cleaning
of the exterior to the interior of the
microwave oven (select models).

COOKSHIELD FINISH
makes the interior of the
microwave easy to wipe clean
without harsh chemicals.
This helps keep it looking clean
and bright longer (select models).

**KITCHENAID
BRAND MEDALLION**
is our iconic finishing stamp:
a mark of craftsmanship and
precision with a stylish touch
of red.

KITCHENAID® BADGE
puts our bold emblem on
every appliance, with thoughtful
details like polished edges and
recessed letters.

CONVECTION COOKING
circulates heat around the
oven cavity with a 1500 Watt
convection element. This allows
baking temperatures up to 425° F
(select models).
SATIN TEXTURED HANDLES
are inspired by professional
kitchens. The sturdy bar handle
shape, sleek chrome caps and
easy-to-clean, satin cross-hatch
texture combine high-style with
a secure grip.

INSTALLATION OPTIONS

BUILT-IN MICROWAVE OVEN

Choose a 30-, 27-, or 24-inch built-in microwave oven to free up counter space. Built-in microwave ovens can be installed into a wall or cabinet for easy access and a sleek appearance.

30- and 27-inch models offer spacer kits to allow a seamless installation in taller cutouts. For added versatility, the 24-inch model includes color-coordinated trim kits for installation into 30- and 27-inch cutouts.

MICROWAVE HOOD COMBINATION OVEN

Over-the-range microwave ovens are designed for installation above a cooktop or range. In addition to providing excellent microwave performance, they capture smoke, grease and odors from the cooking surface below to help maintain a fresh kitchen.

COUNTERTOP MICROWAVE OVEN

A KitchenAid® Countertop Microwave oven can rest on any open surface in the kitchen and can be easily moved. It offers powerful performance that is sufficient for any kitchen. Alternatively, it can be converted for built-in installation by using an optional 30- or

RANGES AT A GLANCE

**EASYCONVECT™
CONVERSION SYSTEM**
takes the guesswork out of convection cooking by ensuring exceptional results when experimenting with new recipes or familiar favorites (select models).

PRECISION TOUCH CONTROLS
offer exceptionally modern easy-to-use displays that put sophisticated functions right at hand (select models).

**MULTI-FINISH
KNOBS**
feature a brushed metal surface offset by sleek chrome and a satin cross-hatch texture for a high-style, non-slip touch. Even more precision is provided by the bladed dial.

TEMPERATURE PROBE
allows accurate measurement of internal temperatures of meats, poultry and casseroles without having to open the oven so that food can be cooked perfectly (select models).

**SLIDE-IN RANGE
DOWNDRAFT OPTION**
integrates the ventilation system right into the range so that a separate hood is not needed. Smoke and odors can be removed and taken outside or air can be filtered and recirculated inside. A duct-free kit can be purchased

BAKING DRAWER
adds more cooking options to the oven. The separate compartment allows you to proof, slow cook or bake at a different temperature than the oven. That means you can cook at two temperatures at the same time.

**CHROME
INLAID FRAME**
creates a beautifully finished transition by adding a chrome accent between glass and brushed metal surfaces (select models).

RANGE STYLES AND FUEL TYPES

ALL RANGES ARE 30-INCH

FREESTANDING
SINGLE OVEN RANGE

FREESTANDING
DOUBLE OVEN RANGE

SLIDE-IN RANGE

DUAL FUEL

Dual fuel ranges feature responsive, sealed gas burner cooking surfaces, while the even-heating electric ovens provide consistent temperatures and clean up easily.

KITCHENAID OFFERS THE INDUSTRY'S ONLY DUAL FUEL DOUBLE OVEN RANGE.

GAS

Ranges with gas burners respond quickly to heat control changes. Full-width grates make it easy to move cookware between burners. All gas ranges feature an impressive convection system and hidden bake burners for easy cleaning.

ELECTRIC

Radiant elements maintain temperatures precisely and clean up quickly. Electric ranges feature a variety of element sizes, allowing you to accommodate different sizes of cookware. Our electric ovens offer a larger capacity than gas ovens and ensure steady temperature management.

INDUCTION

Ranges with induction elements offer quick, efficient response similar to a gas burner. Four induction elements allow you to rapidly boil water and get more precise results. Our true convection oven features Even-Heat™ Technology and a slow cook warming drawer.

EVEN-HEAT™ TRUE CONVECTION

This feature produces flawless results. The unique bow-tie design and convection fan ensure the inside of the entire oven is heated to, and stays at, the perfect temperature.

SLIDE-IN RANGES

The new slide-in range models have finished sides and do not need to be placed between cabinets. Slide-in ranges do not have a backguard and can be installed anywhere in the kitchen. When replacing an existing slide-in range, a seamless look can be achieved with available filler strips to cover any unfinished cutout edge.

Our FIT System gives you the ability to upgrade your freestanding range to a slide-in without having to remodel. It's the perfect fit for a 30-inch cutout.

FREESTANDING RANGES

Freestanding ranges feature finished sides, so they do not require installation between cabinets. They are available in single or double oven options.

Another distinguishing feature on many freestanding ranges is a built-in backguard, which is often where the controls are located.

COMMERCIAL-STYLE

COMMERCIAL-STYLE

Nothing ignites the imagination of a creative cook more than a commercial-style kitchen. With its timeless look, powerful performance and unmistakable craftsmanship, it can satisfy a professional and help the everyday cook transcend the ordinary. It is the at-home culinary experience elevated.

COMMERCIAL-STYLE COOKING
AT A GLANCE

CUSTOMIZABLE POWER WITH A 600 OR 1200 CFM MOTOR ON VENTS

provides powerful performance and durability that come standard with KitchenAid® Commercial-Style Hoods. Customize the power by choosing either a 600 or a 1200 CFM motor* (each sold separately).

CONTINUOUS SURFACE WITH HEAVY-DUTY GRATES ON RANGETOPS

extends across all burners for a robust look that complements the commercial-style design of our rangetops.

ADDITIONAL INSTALLATION OPTIONS ON RANGES

include island trim that allows for placement in an island or peninsula and optional backguards for installation against a wall.
COMMERCIAL BURNERS ON RANGETOPS

feature almost any combination of four or six burners and are available with or without a high-performance electric griddle and/or grill.

*CFM motor based on model requirements.

SIZE AND CONFIGURATION OPTIONS

36-INCH 6 BURNERS
36-INCH 4 BURNERS WITH GRIDDLE
30-INCH 4 BURNERS

PERFORMANCE OPTIONS

PORCELAIN-ON-STEEL GAS RANGETOPS

Heavy-duty single grates combine to create a continuous surface that extends across all burners for a robust look that complements the commercial-style design of our rangetops.

DUAL FUEL RANGES

Commercial-style dual fuel ranges combine high-powered, precise gas burners with electric convection ovens.

WALL-MOUNT CANOPY HOODS

Canopy hoods provide highly effective venting with a 600 or 1200 CFM motor* (each sold separately).

*CFM motor based on model requirements.

CONFIGURATION & INSTALLATION OPTIONS

MOTOR OPTIONS

Powerful performance and durability come standard with KitchenAid® Commercial-Style Hoods. Customize the power by choosing either a 600 or a 1200 CFM motor* (each sold separately). And thanks in part to a robust stainless steel body and heavy-duty filters, these vents can operate over cooking surfaces with outputs up to 108K BTUs.

INSTALLATION OPTIONS

Commercial-style ranges offer more installation options with an included island trim that allows for placement in an island or peninsula and optional backguards for installation against a wall.

HANDLE KIT REPLACEMENT OPTION

The replacement handle features professionally-inspired styling with sleek chrome caps and an easy-to-clean, satin cross-hatch texture. It combines high style with a secure grip. The Handle Kit Replacement Option is available in 30-inch, 36-inch

*CFM motor based on model requirements.

"WE CREATED AN AUTHENTIC COMMERCIAL COOKING EXPERIENCE FOR THE HOME."

JASON TIPPETTS
LEAD INDUSTRIAL DESIGNER FOR
KITCHENAID BRAND

REFRIGERATION

REFRIGERATION

Ingredients inspire cooks to create in the kitchen. And that inspired us to find creative new ways to care for them. Our redesigned refrigerators add life to food and offer innovative storage ideas. They're the first line of refrigerators to care for ingredients the way you care about ingredients.

KitchenAid

BUILT-IN

BUILT-IN REFRIGERATION AT A GLANCE

36-INCH FRENCH DOOR BOTTOM MOUNT BUILT-IN REFRIGERATOR

expands our offering of this stunning, highly popular style of refrigerators to a full-sized 36-inch design.
SATIN-TEXTURED HANDLES

are inspired by professional kitchens. The sturdy bar handle shape, sleek chrome caps and easy-to-clean satin cross-hatch texture combine high style with a secure grip.

KITCHENAID® BADGE

puts our bold emblem on every appliance, with thoughtful details like polished edges and recessed letters.

PLATINUM INTERIOR DESIGN

provides a premium look with silver glossy walls that complement the metallic accents found inside the refrigerator (select models).

LED LIGHTING

gradually increases to full intensity, making it easy to find items inside the refrigerator and freezer, even the crisper.

SATINGLIDE® SYSTEM WITH SOFT, SELF-CLOSE

adds an exceptionally smooth experience to the crisper drawers. The ball-bearing rollers and glides allow effortless in-and-out movement even when fully loaded.

ENERGY STAR® QUALIFIED

This product conserves energy by exceeding minimum federal energy efficiency (select models).

SIZE AND CONFIGURATION OPTIONS

FRENCH DOOR BOTTOM MOUNT

Our French door refrigerators provide an uninterrupted refrigeration space that is the widest among built-in bottom-freezer refrigerators. This lets you take maximum advantage of the French door design. The door swing is similar to a side-by-side, making it an ideal solution for tight spaces because less room is needed for the door to swing open.

Also available in panel ready.*

42-INCH
36-INCH

BOTTOM MOUNT

Bottom-freezer refrigerators feature a classic design that lets you conveniently reach everything in the refrigerator while providing multi-level freezer storage.

Available in right-hand swing or left-hand swing. Also available in panel ready.*

36-INCH

SIDE-BY-SIDE

Side-by-side refrigerators create flexible storage options for both the refrigerator and the freezer. Adjustable shelves and door bins allow you to easily organize your food and keep frequently accessed items in both compartments within easy reach.

Avialable in dispensing and non-dispensing options.

Also available in panel ready.*

48-INCH
42-INCH
36-INCH

*Panel and handle sold separately

PRESERVA®
FOOD CARE SYSTEM

Two independent cooling systems provide a dedicated refrigeration unit to help keep food fresh longer and a separate system for frozen food. The FreshFlow™ Air Filter helps minimize odors while the Produce Preserver helps delay over-ripening.

ADJUSTABLE SPILL RESISTANT GLASS SHELVES

The microedge prevents messes from spilling over into other parts of the refrigerator. In place of a lip that can trap foods, the shelf edges are nano-etched with a finely textured surface that contains spills and lets you use the whole shelf from edge to edge.

INTUITIVE CONTROLS

Intuitive controls make it easy to precisely adjust the temperature of both the refrigerator and freezer.

SIDE-BY-SIDE
PERFORMANCE FEATURES

EXTENDFRESH™ PLUS TEMPERATURE MANAGEMENT SYSTEM

This system uses sensors in the refrigerator and freezer to help ensure all your ingredients remain at the appropriate temperature for optimum taste and texture.

PRODUCE PRESERVER

The Produce Preserver absorbs ethylene gas to help extend the freshness of produce.*

MEASURED WATER FILL

This feature displays and automatically dispenses water in ounces, cups or liters. It can be programmed to pour a measured amount, helping make food prep easier. It can even be set up to fill essential items on a daily basis like a coffeepot or water bottle.

* Based on commonly purchased produce.

INSTALLATION OPTIONS

BUILT-IN FRENCH DOOR AND BOTTOM MOUNT REFRIGERATION

Take the design of your kitchen to the next level with the stunning, high-end look of a KitchenAid® Built-In Refrigerator. They're made to match and enhance the beauty of any home.

KitchenAid® Built-In Refrigerators can be customized to match surrounding cabinets with a panel ready design or stand out as a kitchen statement.

They even give you the flexibility to pair two bottom mount refrigerators together to create a single refrigeration space that's 72"of perfect for entertaining and dinner parties.

SIDE-BY-SIDE BUILT-IN REFRIGERATION

Side-by-side refrigerators create flexible storage options for both the refrigerator and freezer. Adjustable shelves and door bins allow you to easily organize your food and keep frequently accessed items in both compartments within easy reach. Choices include 48-, 42-, and 36-inch wide refrigerators (panel ready shown).

FREESTANDING

FREESTANDING BOTTOM MOUNT REFRIGERATION AT A GLANCE

5-DOOR CONFIGURATION
is the first ever 5-door freestanding refrigerator. This revolutionary configuration is a breakthrough in convenience. It features a dedicated produce drawer and temperature-controlled drawer.

PLATINUM INTERIOR DESIGN
provides a premium look with silver glossy walls that complement the metallic accents found inside the refrigerator (select models).

LED LIGHTING
gradually increases to full intensity, making it easy to find items inside the refrigerator and freezer, even the crisper.
SATINGLIDE® SYSTEM WITH SOFT, SELF-CLOSE
uses space-efficient, under-mounted pans with rollers and glides as well as a soft-close mechanism for satisfyingly smooth operation (select models).

SATIN-TEXTURED HANDLES
are inspired by professional kitchens. The sturdy bar handle shape, sleek chrome caps and easy-to-clean satin cross-hatch texture combine high style with a secure grip.

KITCHENAID® BADGE
puts our bold emblem on every appliance, with thoughtful details like polished edges and recessed letters.

ENERGY STAR® QUALIFIED
This product conserves energy by exceeding minimum federal energy efficiency (select models).

SIZE AND CONFIGURATION OPTIONS

5-DOOR   3-DOOR

FRENCH DOOR BOTTOM MOUNT

Our French door refrigerators provide storage innovation and uninterrupted refrigeration space. They feature a 5-door or a 3-door configuration and are available in Counter-Depth and Full-Depth. Our 3-door model comes in dispensing and non-dispensing options.

Also available in panel ready.*

PRODUCE PRESERVER

The Produce Preserver absorbs ethylene gas to help extend the freshness of produce.*

* Based on commonly purchased produce.

PERFORMANCE FEATURES

MEASURED WATER FILL

This feature displays and automatically dispenses water in ounces, cups or liters. It can be programmed to pour a measured amount, helping make food prep easier. It can even be set up to fill essential items on a daily basis like a coffeepot or water bottle.

MAX COOL

This feature automatically adjusts the temperature in the refrigerator and freezer to the lowest setting when appropriate. This keeps the refrigerator at the ideal temperature when loading groceries, when the doors are frequently opened or in higher room temperatures.

IN-DOOR-ICE® SYSTEM

This system adds interior room in the refrigerator with an ice bin that mounts on the inside left door of the refrigerator, keeping it out of the refrigerator compartment and allowing for extra shelf space.

INSTALLATION OPTIONS

COUNTER-DEPTH

A counter-depth refrigerator creates a refined and integrated look. The cabinet is 24 inches deep, so only the door and handles extend beyond the front of a 24-inch base cabinet.

HEIGHT OPTIONS: KitchenAid offers 69- and 72-inch high models. A 72-inch high refrigerator offers an additional design benefit by filling the space underneath overhead cabinets.

WIDTH OPTIONS: Side-by-side and French door models are 36 inches wide.

STANDARD-DEPTH

These refrigerators have a cabinet that extends beyond the front of a 24-inch base cabinet. They work well in large, spacious kitchens and offer the benefit of larger overall storage than a counter-depth refrigerator.

HEIGHT OPTIONS: Models range from 66¼–70 inches tall.

WIDTH OPTIONS: The 36-inch wide models come in both side-by-side and French door configurations. Select refrigerators are available in 33- or 30-inch widths to fit smaller kitchens.

SIDE-BY-SIDE

Side-by-side refrigerators give you the versatility to store items in the refrigerator and freezer at the same level. Adjustable shelves and door bins make it easy to organize your food and keep frequently accessed items in both compartments within easy reach. Available in counter-depth and standard-depth sizes.

UNDERCOUNTER

STYLE AND PERFORMANCE OPTIONS

WINE CELLARS

Temperature and lighting are critical to preserving wine. Our wine cellars feature dual temperature zones, allowing red and white wines to be stored at different temperatures. A UV-protected thermal glass door filters out harmful UV rays to help maintain temperatures.

Available with Auto-Interior LED Lighting.

24-INCH

BEVERAGE CENTERS

Our beverage centers have two temperature zones, offering the benefits of a wine cellar with the addition of glass shelves for storing other food items and beverages.

Available with Auto-Interior LED Lighting.

24-INCH

UNDERCOUNTER REFRIGERATORS

Undercounter refrigerators keep essential beverages and appetizers close at hand. When one of these units is installed in an island, favorite ingredients can be stored in the same area where food is prepared. Or, place one in any entertaining area to allow more time with guests.

Available with Auto-Interior LED Lighting or LED Interior Lighting.

24-INCH   24-INCH

STYLE AND PERFORMANCE OPTIONS

24-INCH DOUBLE-DRAWER REFRIGERATOR

24-INCH DOUBLE-DRAWER REFRIGERATOR/ FREEZER

DOUBLE-DRAWER REFRIGERATOR/ FREEZER COMBINATIONS

Our double-drawer refrigerators provide supplemental refrigeration in a 24-inch base cabinet. Each drawer is deep enough to hold large, bulky items. And two drawers help keep food organized for preparation or entertaining. The double-drawer refrigerator/freezer model has two independent drawers that make it easy to store more. This combination also features an automatic ice maker, and base-grille water filtration system with an EveryDrop™ Water Filter.

18-INCH WITH OR WITHOUT PUMP

15-INCH WITH OR WITHOUT PUMP

AUTOMATIC ICE MAKERS

Our automatic ice makers supplement a refrigerator for added convenience. All 18- and 15-inch wide automatic ice makers allow for built-in or freestanding installation and produce 50 pounds of ice in a 24-hour period.

18-INCH

OUTDOOR ICE MAKERS

Our outdoor models feature an automatic icemaker that makes alfresco entertaining easy. The weather-resistant, stainless steel gives you the freedom to entertain all year long.

PERFORMANCE FEATURES

TRUE DUAL TEMP (FOR WINE CELLARS)

This feature has two temperature zones to chill both red and white wine at their optimal temperature. This helps preserve the flavor and integrity of individual wines. The top zone adjusts from 42–54°F for whites while the lower zone can be set from 42–64°F for reds.

TRUE DUAL TEMP (FOR BEVERAGE CENTERS)

Two independent temperature zones chill beverages, hors d'oeuvres and wine bottles in their optimal climate. The top zone adjusts temperature from 33–40°F, while the lower zone can be adjusted from 42–64°F.

TOUCH CONTROLS

This is an electronic interface that allows pleasant and precise control over the refrigerator temperatures and settings.

AUTO-INTERIOR LED LIGHTING

These are proximity-activated lights that make it easy to find items inside the unit without having to open the door. One or two rows of LED top-mounted lights slowly illuminate when you approach the unit and gradually turn off when not needed.

LED INTERIOR LIGHTING

These lights illuminate the inside of the unit, making it easy to find items. This upgraded LED lighting is now available in Wine Cellars, Beverage Centers and Undercounter Refrigerators.

OVER TEMP ALARM

This alarm was designed to let you know when the refrigerator temperature rises above 45°F (7°C) for 4 hours or longer. The audio alarm will shut off automatically when the temperature returns to normal.

INSTALLATION AND STYLE OPTIONS

BUILT-IN OR FREESTANDING INSTALLATIONS

Although most often considered as part of a built-in design, specialty refrigeration appliances can be installed in locations that leave one or both sides exposed. Many models feature black cabinets, so you may wish to select a model with stainless steel side panels if placing the appliance in a location where it will be freestanding.

PRODUCT COMBINATIONS

With matching sizes and style options, you can combine specialty refrigeration appliances for attractive design solutions. Take advantage of the left- and right-hand door swings by placing two appliances next to each other with doors that swing open similar to a side-by-side or French door refrigerator. And, when you place two wine cellars side-by-side, you'll have enough capacity to preserve up to 92 wine bottles.

"CREATIVE INSPIRATION CAN BE FOUND IN BOTH CAPACITY AND FUNCTIONALITY."

JASON TIPPETTS
LEAD INDUSTRIAL DESIGNER
FOR KITCHENAID BRAND

CLEANING

CLEANING

From making meals for the family to entertaining friends, presentation matters to cooks. That's why when they create and innovate, it has to be presented on a flawless plate. This thought inspired our new line of cleaning appliances. They combine a beautiful new look with stunning results, ensuring cleanup will be a piece of cake.

DISHWASHERS

DISHWASHERS AT A GLANCE

THIRD LEVEL RACK
is perfect for loading long, flat items. Plus, by tucking items into this clever, out-of-the-way spot, additional space is created on the first and second racks (select models).

EXPRESS WASH CYCLE
quickly and effortlessly handles the heaviest soils, even stubborn baked- and seared-on messes.

WINDOW IN DOOR WITH LIGHTED TUB
allows you to view the dishwasher interior and inspect your dishes to ensure they are sparkling clean even before removing them (select models).

BOTTLE WASH
provides four dedicated spray nozzles in the upper rack that can be placed deep inside tall glasses and bottles to thoroughly clean even deep and odd-shaped dishes (select models).

DYNAMIC WASH ARM
is a uniquely designed arm that features nine wash arms in one for better coverage and superior cleaning. This means dishes get a powerful clean no matter where they are placed in the rack (select models).

CLEAN WATER WASH SYSTEM
with an industry-first, advanced technology pump that continuously removes food particles from the wash water. The innovative filter design never needs to be removed and cleaned (select models). The result is cleaner wash water for superior performance, even with the heaviest loads.

ENERGY STAR® QUALIFIED
In addition to being ENERGY STAR® Qualified, KitchenAid® full-size dishwashers meet Tier 1 Energy Factor (EF) requirements as outlined by the Consortium for Energy Efficiency (CEE). They may be eligible for an energy rebate in select states and provide even greater efficiency for conserving resources.

CONSOLE OPTIONS

ALL DISHWASHERS ARE 24-INCH

HIDDEN CONTROLS

This console has controls hidden from view and status lights with an exterior cycle indicator, giving immediate feedback with changing colors.

Also available in panel ready.*

HIDDEN CONTROLS WITH WINDOW

This dishwasher has hidden controls along with a window and lighted interior. The interior illuminates at the end of each cycle, allowing clean dishes to be inspected before removal.

FLUSH CONSOLE

Controls are within view, at your fingertips and flush with the dishwasher door. Exterior status lights display cycle progress with changing colors.

*Panel and handle sold separately.

PROWASH™ CYCLE

Take the guesswork out of choosing the most effective cycle for clean dishes. Select the ProWash™ Cycle and come back to clean dishes. A sensor determines the optimum amount of water and energy based on the level of cleaning needed.

PROSCRUB® OPTION AND PROSCRUB® UPPER OPTION

KitchenAid® was the first brand to introduce the ProScrub® Option—an innovative solution for removing baked-on, caramelized messes. The ProScrub® Upper Option provides two concentrated spray zones in the upper rack to clean deeper or oddly shaped items. It provides 39% more coverage* with targeted wash action in addition to the 40 spray jets at the back of the dishwasher.

ADVANCED PRODRY™ SYSTEM

All KitchenAid® Dishwashers have a dedicated heating element that provides supplemental heat to get dishes dry. Dishwashers with the Advanced ProDry™ System use a fan to optimize drying performance.

*Compared to ProScrub® Option.

TRASH COMPACTOR

TRASH COMPACTOR AT A GLANCE
SATIN TEXTURED HANDLES
are inspired by professional kitchens. The sturdy bar handle shape, sleek chrome caps and easy-to-clean satin cross-hatch texture combine high-style with a secure grip.

KITCHENAID BRAND MEDALLION
is our iconic finishing stamp; a mark of craftsmanship and precision with a stylish touch of red.

⅓ HP MOTOR
helps ensure powerful, worry-free operation.

KITCHENAID® BADGE
puts our bold emblem on every appliance, with thoughtful details like polished edges and recessed letters.

SOLID PACK™ CONTROL WITH 5:1 COMPACTION RATIO
reduces waste volume by up to 80%, allowing the compactor to condense the amount of garbage that would fill five trash bags into one bag.

PERFORMANCE

When Solid Pack™ Control is selected, the compactor ram applies 2,300 pounds of pressure to the contents. The 5:1 compaction ratio condenses the amount of garbage that would fill five trash bags into one bag.

Whisper Quiet® Plus helps maintain a quiet home environment while the compactor is running.

CONFIGURATION

KitchenAid offers a 15-inch compactor with a 1.4 Cu. Ft. capacity. Its fully integrated design has controls that are hidden from view and features a start control on the foot pedal. This compactor is available in stainless steel (shown, above), black or white, or can accept a custom panel* (shown, left).

*Panel and handle sold separately

DISPOSERS

FOOD WASTE DISPOSER OPTIONS

MULTIGRIND PLUS™ TECHNOLOGY

Two- and three-stage grinding technology is an ideal solution for stringy foods such as corn husks and celery. This technology also features a sensor that will break through tough jams before a problem occurs, so you can grind more kinds of food waste with reduced clogging.

SOUNDSEAL PLUS™ TECHNOLOGY

The combination of advanced sound insulation and anti-vibration components reduces noise levels by up to 60% compared to other standard disposers. These disposers are the perfect companion to today's low-decibel dishwashers.

MOTOR SIZE OPTIONS

KitchenAid® Food Waste Disposers feature ½-, ¾- and 1-horsepower motors. A bigger motor can handle the requirements of a large family, while our smaller motor is ideal for those who live in an apartment or have a small family.

FEED OPTIONS

Continuous feed disposers can run constantly while they're fed more contents and are usually run by a wall switch for convenient operation.

Our batch feed disposer only operates when the special cover is in place. Waste goes in for grinding, but the lid must be locked in place for the disposer to operate. It is ground and disposed of batch-by-batch.

PRODUCT DIMENSIONS

Important Installation Information Regarding Flush Install
Flush Install requires a special kit.

Regarding the Steam Function
The steam function on this oven is configured for direct plumbing to a nearby water supply. Included with the product are the water filter housing, one water filter, a small section of copper tubing at the back of the oven, and a water supply union to attach the copper tubing to the water supply line. Water supply lines are not included. The water filtration system should be installed upright and adjacent to the oven near the cold water supply pipe under the kitchen sink.

See Installation Instructions for complete details.

DIMENSIONS

OVEN SIZE	36"	30"	27"	24"
Oven Cutout Dimension	$34^1/2$"	$28^1/2$"	$25^1/2$"	$22^1/2$"

NOTE: For undercounter installation, it is recommended that the junction box for the oven be located in the adjacent right or left cabinet. A 1" minimum diameter hole should have been drilled in the upper rear right or left corner of the side wall surface to pass the appliance cable through to the junction box.

The upper shaded areas are recommended locations for recessed junction box for 120-volt grounded outlet for cooktop.

Lower shaded areas are recommended locations for flexible or rigid gas pipe installation. The gas connection on the cooktop is on the right (same location as "J" in the above diagram). The gas pipe can be installed on either side of the cutout, and either through the floor or through the wall. Refer to local codes regarding the use of gas lines.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

H. 9$\frac{5}{16}$"
I. 13$\frac{3}{8}$" from the top of the countertop surface
J. Wall exhaust option

CUTOUT DIMENSIONS

A. 30"

B. Combustible area above countertop (shown by dashed box)

C. 30" minimum clearance between top of cooktop platform and bottom of uncovered wood or metal cabinet (24" minimum clearance if bottom of wood or metal cabinet is covered by not less than $\frac{1}{4}$" flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" stainless steel, 0.024" aluminum, or 0.020" copper)

D. 13" recommended upper cabinet depth

E. 2$\frac{1}{8}$"

F. 19$\frac{15}{16}$"

G. 18" minimum clearance from upper cabinet to countertop within minimum horizontal clearances to cooktop

H. Junction box or outlet: 12" minimum from bottom of countertop

I. Junction box or outlet: 10" from right-hand side of cabinet

J. 28$\frac{5}{8}$"

K. 8" minimum distance to nearest left and right side combustible surface above cooktop

L. 2" minimum clearance between back wall and countertop

M. Gas line opening – wall: anywhere 6" below underside of countertop on the left side; cabinet floor: anywhere within 6" of rear wall on the left side is recommended.

N. 25" depth of countertop

NOTES: After making the countertop cutout, some installations may require notching down the base cabinet side walls to clear the cooktop base. To avoid this modification, use a base cabinet with side walls wider than the cutout.

• A minimum side clearance of 6" is recommended between side of cooktop and side wall for maximum ventilation performance.

• A minimum clearance of 2" is recommended between the motor/blower and cabinet for proper cooling. A 6" clearance is recommended for servicing access.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

Junction box or outlet; 12" minimum from bottom of countertop; 10" from right side of cabinet

NOTES: 24" min. clearance if bottom of wood or metal cabinet is protected by not less than ¹/₄" flame retardant millboard covered with not less than No. 28 MSG sheet steel, 0.015" stainless steel, 0.024" aluminum, or 0.020" copper.

30" min. clearance between top of cooktop platform and bottom of unprotected wood or metal cabinet.

If installing a hood above the cooktop, follow hood instructions for dimensional clearances above the cooktop surface.

Electrical Requirements:
A 4-wire or 3-wire, single phase, 240 volt, 60 Hz., AC only electrical supply is required on a separate, 50-amp circuit (36" model) or 40-amp circuit (30" model), fused on both sides of the line.

IMPORTANT: For proper ventilation, provide a vent of ³/₁₆" under the countertop, in the front of the cabinet. The ventilation opening is to extend the full length of the cooktop cutout. See the following illustration.
³/₁₆"

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.
# ELECTRIC COOKTOP & RETRACTABLE DOWNDRAFT SYSTEM COMBINATION

DIMENSIONS – shown in inches

MODEL NO.	30-INCH* KECC607B KECC605B KECC604B KECC602B
INSTALLED WITH RETRACTABLE DOWNDRAFT SYSTEM MODEL NO.	KXD4630Y
CUTOUT DIMENSIONS	
Width Cooktop and Downdraft Vent System (A)	$31^1/_2$
Width Cooktop (B)	$29^1/_2$
Width Downdraft Vent System (C)	$27^1/_2$
Depth Downdraft Vent System (D)	$2^1/_8$
Depth Cooktop (E)	$20^1/_2$
Depth Cooktop and Downdraft Vent System (F)	$23^1/_4$
Depth Countertop Front Edge to Cutout (G)	2
Depth Countertop (H)	$25^7/_8$ min.

*Installation with retractable downdraft vent system requires countertop and base cabinet deeper than standard 25" deep countertop and 24" deep base cabinet.

CUTOUT DIMENSIONS

IMPORTANT: Countertops with a bullnosed front edge are not recommended for these installations.
COUNTERTOP PREPARATION
INDUCTION OR ELECTRIC COOKTOP & WALL OVEN COMBINATION

APPROVED MODEL NUMBER COMBINATIONS*

INDUCTION COOKTOPS: KICU569X, KICU509X

ELECTRIC COOKTOPS: KECC667B, KECC664B, KECC607B, KECC605B, KECC604B, KECC602B, KECC056R

WALL OVENS: KEBC167V, KEBU107S, KEBS109B, KEBK101B, KEBS179B, KEBK171B, KEBC147V

*For the approved model number combinations, refer to the undercounter label located on top of the oven chassis and on the bottom of the cooktop burner box.

CUTOUT DIMENSIONS

A. 24" cabinet depth

B. 25" countertop depth

C. Recommended oven and cooktop junction box locations

D. Allow $^5/_8$" for oven to overlap on each side

E. $27^3/_4$" minimum cutout height

F. 36" from cabinet base to countertop

G. Induction cooktop: $3^5/_8$" from cabinet base. If dimension "F" is greater than 36" dimension "G" can be increased the same difference for induction combinations. Electric cooktop: $4^5/_8$" maximum from cabinet base

H. See chart below

I. Induction cooktop: $32^3/_8$" from top of countertop to bottom of cutout Electric cooktop: $31^3/_8$" from top of countertop to bottom of cutout
NOTE: For undercounter installation, it is recommended that the junction boxes for oven and cooktop be located in the adjacent right or left cabinet. A 1" minimum diameter hole should have been drilled in the upper rear right or left corner of the side wall surface to pass the appliance cable through to the junction box.

The included microwave oven spacer kit will allow the microwave oven to be installed in a 17^3/$_8$"-17^3/$_4$" maximum cutout height.

A. KMBP100E: 29^3/$_4$" overall width
KMBP107E: 26^3/$_4$" overall width

An optional microwave oven spacer kit is available that will allow the microwave oven to be installed in a 19"-19^3/$_{16}$" maximum cutout height.
KMBP100E: Model W10469903
KMBP107E: Model W10469901

CUTOUT DIMENSIONS
A. KMBP100E: 30" min. cabinet width
KMBP107E: 27" min. cabinet width

B. 18^5/$_8$" height from bottom of cutout to bottom of upper cabinet door

C. 40" bottom of cutout to floor (recommended)

D. KMBP100E: 28^1/$_2$" cutout width
KMBP107E: 25^1/$_2$" cutout width

E. 1^1/$_2$" min. bottom of cutout to top of cabinet door

F. 17^5/$_8$" recommended cutout height*

G. 21^7/$_8$" min. cutout depth

*Will fit cutout height from 17^3/$_8$" to 17^3/$_4$."

LOCATION REQUIREMENTS

Electrical supply junction box should be located 3" maximum below the support surface when the microwave oven is installed in a wall cabinet. A 1" minimum diameter hole should have been drilled in the right rear or left rear corner of the support surface to pass the appliance cable through to the junction box.

Regarding Flush Install
Flush Install requires a special kit.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

O. Notch to be equal on both sides
P. 13" upper cabinet depth

*If back wall is constructed of a combustible material and a backguard is not installed, a minimum clearance of dimension A + 6" is required for 48" rangetops and model KGCU462V.

**Dimension "B" can be reduced by 6" when bottom of wood or metal cabinet is protected by not less than 0.25" flame retardant millboard covered with not less than No. 28 MSG sheet metal, 0.015" stainless steel, 0.024" aluminum, or 0.020" copper.

If installing a hood above the rangetop, follow the hood instructions for dimensional clearances above the cooking surface.

†Zero clearance fit.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

 not installed, a 6" minimum clearance is
 required for all ranges.

Important Installation Information Regarding the Steam Function

The steam function on select ranges is configured for direct plumbing to a
nearby water supply. Included with the product are the water filter housing,
one water filter, a small section of copper tubing at the back of the range,
and a water supply union to attach the copper tubing to the water supply
line. Water supply lines are not included. The water filtration system should
be installed upright and adjacent to the range near the cold water supply pipe
under the kitchen sink.

See Installation Instructions for complete details.
Anti-tip bracket:
Anti-tip bracket must be securely mounted
to subfloor or wall. Thickness of flooring
may require longer screws to anchor bracket
to subfloor. Longer screws are available
from your local hardware store.

Suggested maximum distance "X": 36"
For vented installation, the chimney can be adjusted
for ceilings between 8' 2³/₈" and 8' 10¹⁵/₁₆" for gas and
between 7' 8³/₈" and 8' 4³/₁₆" for electric

NOTE: The hood chimney is adjustable and designed to meet
varying ceiling or soffit heights, depending on the distance "X"
between the bottom of the hood and the cooking surface. For
higher ceilings, a chimney extension kit (Part No. W10352733)
is available from your dealer or an authorized parts distributor.
The chimney extension replaces the upper chimney shipped with
the hood.

BUILT-IN FRENCH DOOR AND BOTTOM-FREEZER REFRIGERATORS (CONTINUED)

CUTOUT DIMENSIONS

Anti-tip board location*
80"-90" above the floor

4"

Grounded electrical
outlet location.

I

Height to bottom
of solid soffit.*

*The solid soffit must be within 1" maximum
above the refrigerator. If the solid soffit is
higher than 1" or one is not available, then
the refrigerator must be braced to prevent
tipping during use.

77"

H

Optional water
line location.

Access hole for
water shutoff must be
within $1/2$" of rear wall.

6"   1"   6"

J

The location must permit both doors
to open to a minimum of 90°. Allow $4^1/2$"
minimum space between the side of the
refrigerator and a corner wall, including
baseboard area.

More clearance may be required if you
are using overlay panels or custom handles.

Electrical: A 115 Volt, 60 Hz., AC only
15- or 20-amp fused, grounded electrical
supply on a separate circuit. A GFCI
(Ground Fault Circuit Interrupter) outlet
is not recommended.

Water Supply: A cold water supply
with water pressure between 30 and
120 psi (207-827 kPa).

Water shutoff may be located in the
base cabinet on either side of refrigerator
for easy access.

If installed behind refrigerator, water
shutoff valve must be angled so that tubing
is not damaged.

Face of cabinetry must be plumb.
Floor: Must support refrigerator
(more than 600 pounds) and must
be at the same level as flooring
in the room.

Dimensions are for planning purposes only. For complete details, see Installation
Instructions packed with product. Specifications subject to change without notice.

WARRANTY INFORMATION

Warranty terms are subject to change, and below summaries are provided for reference purposes only.
Visit KitchenAid.com for the most current warranty details including applicable terms, conditions and exclusions,
or consult the Use & Care Guide provided with your product.

COOKING PRODUCT LIMITED WARRANTIES

	1st YEAR (limited parts and labor)	2nd-5th YEAR (limited parts only)	2nd-10th YEAR (limited parts only)
WALL OVENS	Entire product	Electric elements, solid-state touch-control system parts	
SLOW COOK WARMING DRAWERS	Entire product		
COOKTOPS	Entire product	Gas burners, electric elements, solid-state touch-control system parts. Any cracking due to thermal shock of the ceramic-glass cooktop. Any cracking of the rubber seal between the ceramic-glass cooktop and porcelain edge. Surface unit elements	
DUAL FUEL RANGES	Entire product	Electric elements, gas burners, solid-state touch-control system parts	Porcelain oven cavity/inner door against rust-through (on steam-assist dual fuel ranges only)
GAS RANGES	Entire product	Gas burners, solid-state touch-control system parts	
ELECTRIC RANGES	Entire product	Electric elements, solid-state touch-control system parts. Any cracking due to thermal shock of the ceramic-glass cooktop. Any cracking of the rubber seal between the ceramic-glass cooktop and porcelain edge. Surface unit elements	
BUILT-IN MICROWAVE OVENS, MICROWAVE HOOD COMBINATION OVENS, COUNTERTOP MICROWAVE OVENS	Entire product	Electric element, solid-state touch-control system parts	Stainless steel cavity/inner door against rust-through (on built-in microwave ovens only)
VENTILATION SYSTEMS*	Entire product		

*Excludes microwave hood combination ovens.

WARRANTY INFORMATION (CONTINUED)

Warranty terms are subject to change, and below summaries are provided for reference purposes only.
Visit KitchenAid.com for the most current warranty details including applicable terms, conditions and exclusions,
or consult the Use & Care Guide provided with your product.

REFRIGERATION PRODUCT LIMITED WARRANTIES

	1st-2nd Year (limited parts and labor)	3rd-6th Year (limited parts and labor)	7th-12th Year (limited parts only)
BUILT-IN REFRIGERATION	Entire product*	Sealed refrigeration system**	Sealed refrigeration system**
	1st Year (limited parts and labor)	**2nd-5th Year** (limited parts and labor)	**6th-10th Year** (limited parts only)
FREESTANDING REFRIGERATION	Entire product*	Sealed refrigeration system,** refrigerator/freezer cavity liner (cracking only)	Sealed refrigeration system**
	1st-2nd Year (limited parts and labor)	**3rd-6th Year** (limited parts and labor)	**7TH-12th Year** (limited parts only)
DRAWER REFRIGERATION	Entire product*	Sealed refrigeration system**	Sealed refrigeration system**
	1st Year (limited parts and labor)	**2ND-5TH Year** (limited parts and labor)	
UNDERCOUNTER REFRIGERATORS, WINE CELLARS, BEVERAGE CENTERS	Entire product*	Sealed refrigeration system,** refrigerator/freezer cavity liner (cracking only)	

*Excludes water filter (30-day limited warranty).
**Includes compressor, evaporator, condenser, dryer, and connecting tubing.

CLEANING PRODUCT LIMITED WARRANTIES

	1st Year (limited parts and labor)	2nd-5th Year (limited parts only)	Lifetime (limited parts and labor)
DISHWASHERS	Entire product	Electronic controls, nylon dish racks	Stainless steel tub, inner door liner
TRASH COMPACTORS	Entire product*		
	1st Year (limited parts and labor)	**1st-5th Year** (limited parts and labor)	**1st-7th Year** (limited parts and labor)
FOOD WASTE DISPOSERS	Entire product for model KCDB250G	Entire product for models KCDS075T, KCDI075B	Entire product for models KBDS100T, KCDS100T

*Excludes original charcoal filter and air freshener (30-day limited warranty).
